patterns and flows of electrical fields between antenna elements and in the surrounding space In particular the analysis of field flows makes it possible to substantiate a rigorous method for analyzing microstrip antennas The characteristics of antennas in various conditions of their installation are considered and compared The results of the use of multi floors structures that provide in the wide frequency range the radiation in direction perpendicular to the antenna axis and structures that make it possible to reduce the mutual influence of antennas located at different heights on a common mast are described , **American Society of Heating and Ventilating Engineers Guide** ,1933 *Annual Book of ASTM Standards* ASTM International,American Society for Testing and Materials,2003 **American Society of Heating and Ventilating Engineers Guide** American Society of Heating and Air-Conditioning Engineers,1933 **Heating, Ventilating, Air Conditioning Guide** ,1933 **Specifications and Drawings of Patents Issued from the United States Patent Office** United States.
