manufactured in Shakespeare's lifetime and the second covers documents made between 1622 and 1728. The illustrated general introduction presents an overview of the texts available to editors and describes how they define Shakespeare. An essay on error surveys kinds of error characteristic of these early text technologies. It is followed by a general introduction to the music of Shakespeare's plays, introductions to individual works, and an extensive foot of the page textual apparatus record and discuss editorial corrections of scribal and printing errors in the early documents, marginal notes, record press variants, and key variants in different documents. Original music notation is provided for the songs where available. Because the plays were written and copied within the framework of theatrical requirements, casting charts identify the length and type of each role, discuss potential doubling possibilities, and note essential props. The New Oxford Shakespeare consists of four interconnected publications: the Modern Critical Edition with modern spelling, the Critical Reference Edition with original spelling, a companion volume on Authorship, and an online version integrating all of this material on OUP's high-powered scholarly editions platform.
