the fundamental question of cultural pluralism This book presents an informative and well argued discussion on many aspects of international arbitration clarifying the main procedural and substantive similarities and differences between different legal systems around the world focusing not only on common and civil law traditions but also the role played by regional legal traditions including Islamic law and African perspectives With contributions from fifty arbitrators counsel and academics representing every region of the world where international arbitration has secured a foothold the volume consolidates and synthesizes a series of discussions sponsored by the Chartered Institute of Arbitrators that took place in Dubai Johannesburg and Paris in 2017 The essays identify and address the cultural distinctions that affect the key ever present factors which have forged the character of modern international arbitration such as the following the seat of the arbitration and the legal regime to which the arbitration is attached due process which has different and specific meanings in different national legal systems international standards such as international public policy illegality arbitrability and sanctions the immunity of international arbitrators form of presentation of evidence production of documents oral and written submissions and expert evidence the specific context of international investment arbitration disputes in specific industries or legal areas telecommunications construction mining intellectual property the role of national judges and the legal traditions they embrace throughout and after arbitration proceedings how to incorporate more conciliatory cultural traditions which are notably shared in many African and Asian countries and training and opportunities for the next generation in international arbitration The book is replete with tools and recommendations to ensure synergy and harmony between the different legal traditions that coexist in today s arbitral proceedings All users of arbitration whether the arbitrators themselves lawyers involved as counsel for parties or judges applying arbitration law will greatly appreciate this matchless elucidation of the different systems and alternative ways of presenting the divergent procedures and ways of conducting international arbitrations The book s immeasurable value to arbitration academics goes without saying

Mestizo International Law Arnulf Becker Lorca,2015-01-01 The development of international law is conventionally understood as a history in which the main characters states and international lawyers and events wars and peace conferences are European Arnulf Becker Lorca demonstrates how non Western states and lawyers appropriated nineteenth century classical thinking in order to defend new and better rules governing non Western states international relations By internalizing the standard of civilization for example they argued for the abrogation of unequal treaties These appropriations contributed to the globalization of international law With the rise of modern legal thinking and a stronger international community governed by law peripheral lawyers seized the opportunity and used the new discourse and

institutions such as the League of Nations to dissolve the standard of civilization and codify non intervention and self determination These stories suggest that the history of our contemporary international legal order is not purely European instead they suggest a history of a mestizo international law The International Law on Foreign Investment M.

Sornarajah,2010-05-06 This book is a thought provoking and authoritative text on this fast moving field of international law

Index-catalogue of the Law Library of the Supreme Court of Ohio. May 1, 1914 Ohio. Supreme Court. Law Library,Edward Antrim,1914 **The Crime of Destruction and the Law of Genocide** Caroline Fournet,2016-03-16 This highly original work provides a thought provoking and valuable resource for researchers and academics with an interest in genocide criminology international organizations and law and society In her book Caroline Fournet examines the law relating to genocide and explores the apparent failure of society to provide an adequate response to incidences of mass atrocity The work casts a legal perspective on this social phenomenon to show that genocide fails to be appropriately remembered due to inherent defects in the law of genocide itself The book thus connects the social response to the legal theory and practice and trials in particular Fournet s study illustrates the shortcomings of the Genocide Convention as a means of preventing and punishing genocide as well as its consequent failure to ensure the memory of this heinous crime *Genocide and Crimes Against Humanity* Caroline Fournet,2013-01-31 This book explores the ambiguities of the French law of genocide by exposing the inexplicable dichotomy between a progressive theory and an overly conservative practice Based on the observation that the crime of genocide has remained absent from French courtrooms to the benefit of crimes against humanity this research dissects the reasons for this absence reviewing and analysing the potential legal obstacles to the judicial use of the law of genocide before contemplating the definitional impact of this judicial reluctance and the consequent confusion between the two crimes Whilst it uses the French law of genocide and related case law on crimes against humanity as its focal points the book further adopts a more general standpoint suggesting that the French misunderstandings of the crime of genocide might ultimately be symptomatic of a more widespread misconception of the crime of genocide as a crime perpetrated against a group **Private International Law in BRICS** Stellina Jolly,Saloni Khanderia,2024-08-08 This book examines the

convergences divergences and reciprocal lessons that the BRICS countries Brazil Russia India China and South Africa share with one another in developing the principles of private international law The chapters provide a thematic understanding of the cornerstones of private international law in each of the BRICS countries namely 1 the procedure to initiate claims in civil and commercial matters 2 the law that would govern such matters in litigation and arbitration as well as 3 the mechanism to recognise and enforce foreign judgments and arbitral awards Written by leading private international law scholars and practitioners the chapters draw on domestic legislation and its interpretation through cases decided by the courts in each of these emerging economies and explicitly cover the rules applicable in contractual and non contractual concerns and issues of choice of court agreements Issues around marriage divorce matrimonial property succession and surrogacy are also

addressed considering the implication of such aspects through the increased movement of persons The book is a useful comparative resource for the governments of the BRICS countries legislators traders academics researchers and students looking for an in depth discussion of the reciprocal lessons that these countries may have to offer one another on these issues

Legal Framework for the Admission of FDI Thomas Pollan, 2006 The law on foreign direct investment FDI belongs to the fastest changing legal field in international law Investors and the host state have long left behind a relationship dominated by the host state's desire to screen and choose FDI In the current market for FDI both parties try to assert influence but in the end the scarcity of FDI is the decisive factor This book provides an in depth study of the legal framework for the admission of FDI and presents insights into the pros and cons of various admission models Its goal is to identify legal and policy options that serve the host state's and investor's common needs The book is a comprehensive easy reference handbook that is of interest to lawyers academics and policy makers *The Law and Politics of International Regime Conflict* Dirk Pulkowski, 2014-02-13 The international order is constituted by a plurality of international regimes institutionalized arrangements in different issue areas that possess their own norms and procedures The present book examines how conflict among regimes may arise and probes the role that international law can play in managing such conflict Throughout the book the example of trade in cultural products is used to illustrate the evolution of regime conflict and the potential for its management Conflicts between the goals of free trade and cultural diversity have notably surfaced within the World Trade Organization WTO and the United Nations Educational Scientific and Cultural Organization UNESCO As a result there is a potential for conflict among WTO law the UNESCO's Convention on the Protection and Promotion of the Diversity of Cultural Expressions and human rights The book posits that three dimensions are characteristic for regime conflict First regime conflict is a function of conflict among different social goals or values Second such goal conflicts are institutionalized through the interaction of a variety of political actors struggling for influence often in intergovernmental organizations Third regime conflict may manifest itself in conflicts of legal rules If a state acts in conformity with the rules of one regime its conduct may trigger a violation of the rules of another regime The author argues that while international law cannot be construed as a fully integrated and unified system it does provide a common language for different regimes to engage with each other The shared discourse rules of international law enable a degree of coordination of the policies of different regimes notably through techniques of interpretation and legal priority rules International law contributes to the management of regime conflict by providing commonly accepted reasons for choosing among competing policy goals

Partnership Rights, Free Movement, and EU Law Helen Toner, 2004-12-31 This book considers the case for modernising partnership rights in EC family reunification law Existing Community law traditionally guarantees immigration rights only to spouses and yet there is a growing diversity of national laws on same sex marriage registered partnerships and recognition of cohabitation The Community institutions which have recently framed new legislation seem to view this as a question that can be settled by political agreement with little or no outside constraint The book challenges this assumption The book outlines recent developments in national legal systems and traces the development of the recent Community legislation Then drawing on basic ECHR principles the place of the ECHR in Community law and on basic Community law principles of free movement and discrimination the book argues that the right of a migrant EU Citizen to family reunification for a cohabiting partner is presumptively protected and therefore justification for refusing to admit such partners must be provided It also considers the possible justifications for marriage partners only immigration policies and concludes that although possible such justifications are far from certain to succeed The discussion also tackles the question of whether judicial activism is appropriate or whether there should be judicial deference to the legislative process recently completed The book concludes with a wider discussion of the proper response of Community law to the increasing diversity of Member States family laws and policies beyond the field of immigration rights The book will be of value not only to immigration lawyers but also to those interested in partnership rights generally as well as to a wider audience of EU lawyers primarily academics but also graduate students and practitioners

International Law as Social Construct Carlo

Focarelli,2012-05-24 The book distils and articulates international law as a social construct It does so by analysing its social foundations essence and roots in practical and socially workable as opposed to pure reason In addition to well known doctrines of jurisprudence and international law it draws upon psycho analytic insights into the origins and nature of law as well as philosophical social constructivism The work suggests that seeing law as a social construct is crucial to our understanding of international law and to the struggle to create better working rules The book re conceptualizes both past and new doctrines of international law as constructs namely as strategies of concomitantly de mythologizing and re mythologizing international law Key areas of international law including subjects sources hierarchy values and remedies are shown to be part of this process The social impact on international law of transnational actors and stakeholders normative fragmentation global justice legitimacy of both rules and players dynamics and hierarchization of norms compliance and implementation in municipal law is also extensively investigated Five basic values of the international community namely security humanity wealth environment and knowledge are explored by stressing their inter and intra tensions Finally the analysis is extended to the role that international courts play in the prosecution of heads of state and other transnational players who violate international law

International Law's Objects Jessie Hohmann,Daniel Joyce,2018-12-20 International law s rich existence in the world can be illuminated by its objects International law is often developed conveyed and authorized through its objects and or their representation From the symbolic the regalia of the head of state and the symbols of sovereignty to the mundane a can of dolphin safe tuna certified as complying with international trade standards international legal authority can be found in the objects around us Similarly the practice of international law often relies on material objects or their image both as evidence satellite images bones of the victims of mass atrocities and to found authority for instance maps and charts This volume considers these questions firstly what might the study of international law through objects reveal What might objects rather than texts tell us about sources recognition of states construction of territory law of the sea or international human rights law Secondly what might this scholarly undertaking reveal about the objects as aims or projects of international law How do objects reveal or perhaps mask these aims and what does this tell us about the reasons some physical or material objects are foregrounded and others hidden or ignored Thirdly what objects icons and symbols preoccupy the profession and academy

The personal selection of these objects by leading and emerging scholars worldwide will illuminate the contemporary and historical fascinations of international lawyers. As a result, the volume will be an important artefact itself, an object in its own right capturing the mood of international law in a given moment and providing opportunity for reflection on these preoccupations. By considering international law in the context of its material culture, the authors offer a new theoretical perspective on the subject.
