### Hydraulic Remote Control System

Hydraulic pressure for the Remote Control system is provided by the regular Farmall Touch-Control pump. Farmall Remote Control can be obtained already installed on new tractors or can be installed on your present Farmall 130 or 130 Hi-Clear.

With Remote Control, you can make implement adjustments while on the go. Plows and other implements are lifted quickly and surely for fast turns on narrow headlands.

Remote Control, with its powerful two-way action, not only raises implements, but also lowers them with controlled power. Because of this two-way action, you can maintain the operating position of the implement at any point between the fully raised and fully lowered positions. In hard soils, positive pressure on the piston applies down pressure so that the implement will work at the full depth selected. You can decrease as well as increase disk harrow angle on the go or you can work at the full angle selected by positioning the stop limit collar. You have more accurate, more positive control with two-way power.

The eight-inch stroke cylinder used in conjunction with Hydraulic Remote Control can be used on a variety of trailing-type implements. It may be used on any type or make of implement having mounting dimensions conforming to ASAE-SAE standards for cylinders of this size.

Thus, you can economically enjoy the benefits of Hydraulic Remote Control all season long—with trailing-type implements such as moldboard, disk or harrow plows, disk harrow, two-row lister, mower, field cultivator, and others.

You also can convert many of your present trailing-type implements to Remote Control operation. Easily installed mounting kits are available for this purpose. Your IH dealer can give full information about McCormick implements.

The Remote Control cylinder is quickly transferred from job to job. It weighs only 26 pounds. When the load is removed from the cylinder, finger pressure is sufficient to release the pins holding the cylinder in the mountings. The mountings are equipped with pins to lock the implement in the raised position when the cylinder is removed.

The Remote Control is easily installed on your Farmall 130 or 130 Hi-Clear by merely removing the present manifold and installing the Remote Control manifold and valve.

The control lever, hoses and break-away coupling are also easily connected to the tractor by means of small bolts and clips.

Control valve hoses and control lever.

The Hydraulic Remote Control consists of new manifold tubes from pump to cylinder block, a control valve with hand lever and connecting linkage, hose lines, break-away coupling front section and attaching parts.

The 2½ x 8-inch hydraulic (push-type) cylinder with hydraulic stop, two 105-inch hoses and a break-away coupling rear half are not included and must be ordered separately if you are not already so supplied.

The lightweight, tubular steel cylinder (2½-inch diameter) is quickly installed on any implement having mounting dimensions conforming to ASAE-SAE standards.
