Handbook of Africa's International Relations Tim Murithi, 2013-09-05 Africa s international relations have often been defined and oriented by the dominant international and geopolitical agendas of the day In the aftermath of colonialism the Cold War became a dominant paradigm that defined the nature of the continent s relationship with the rest of the world The contemporary forces of globalization are now exerting an undue influence and impact upon Africa s

international relations Increasingly the African continent is emerging as a vocal and in some respects an influential actor in international relations There is a paucity of analysis and research on this emerging trend This timely book proposes to fill this analytical gap by engaging with a wide range of issues with chapters written by experts on a variety of themes The emerging political prominence of the African continent on the world stage is predicated on an evolving internal process of continental integration In particular there are normative and policy efforts to revive the spirit of Pan Africanism the 21st century is witnessing the evolution of Pan Africanism notably through the constitution and establishment of the African Union AU Given the fact that there is a dearth of analysis on this phenomenon this volume will also interrogate the notion of Pan Africanism through various lenses notably peace and security development the environment and trade The volume will also engage with the emerging role of the AU as an international actor e g with regard to its role in the reform of the United Nations Security Council climate change the International Criminal Court ICC the treaty establishing Africa as a nuclear free zone Internally Displaced Persons the Millennium Development Goals MDGs international trade the environment public health issues security and development issues This book will assess how the AU s role as an international actor is complicated by the difficulty of promoting consensus among African states and then maintaining that consensus in the face of often divergent national interests This book will in part assess the role of the AU in articulating collective and joint policies and in making interventions in international decision and policy making circles The Handbook will also assess the role of African social movements and their relationship with global actors The role of African citizens in ameliorating their own conditions is often underplayed in the international relations discourse and this volume will seek to redress this oversight Throughout the book the various chapters will also assess the role that these citizen linkages have contributed towards continental integration and in confronting the challenges of globalization

Towards World Heritage Professor Melanie Hall, 2012-11-28 Historic preservation whether of landscapes or buildings was an important development of the nineteenth century in many countries There is however surprisingly little understanding about how it took place and research into it is narrowly focused For example generally landscape preservation from this time is examined separately from buildings preservation is seen in terms of national narratives or considered within the contexts of area studies and it is usually seen from a specific disciplinary perspective All of these later categorizations did not apply at the time and consequently a very partial view is achieved In order to begin unlocking a very complex phenomenon that has helped to define our own age this dynamic collection of essays brings together an international and transdisciplinary line up of academics and practitioners to reconsider preservation s origins in the second half of the nineteenth and early part of the twentieth century With a focus on Britain and the British Empire and including case studies from the United States Canada Sweden France Germany Sri Lanka The Holy Land and Turkey this book places preservation in imperial international and national contexts demonstrating that there was far more interaction between different countries in this arena than may be supposed and revealing remarkable but hitherto hidden

overlaps and intersections It examines three main themes the influence of religion the political and sub diplomatic aspects of preservation and the professionalization of preservation practice Internationalizing trends already existed through the churches the universities and the diplomatic services as well as familial ties that had an important impact on preservation s epistemic communities and its targets Other internationalizing factors include an interest in national histories and the histories of architecture and art particularly when known through illustration a growing interest in biography especially of founding fathers or famous literary figures and tourism Although the focus is on architectural preservation this book demonstrates that in this formative period the preservation of buildings and landscapes needs to be considered together as it often was at the time and in context The conclusion reached is that the preservation movement has to be understood in imperial and international contexts rather than in simply national or regional ones
