Reading and Understanding Research Lawrence F. Locke, Stephen J. Silverman, Waneen Wyrick Spirduso, 2010. There is virtually no way to complete one's education without encountering a research report. The book that has helped demystify qualitative and quantitative research articles for thousands of readers from the authors of the best-selling *Proposals that Work* has been revised. This edition is completely reorganized to separate quantitative and qualitative research with four new distinct sections: research reports, quantitative research, qualitative research, and research reviews. The authors presume no special background in research and begin by introducing and framing the notion of reading research within a wider social context. Next, they offer insight on when to seek out research, locating and selecting the right reports, and how to help evaluate research for trustworthiness. *Human Resource Management* Derek Torrington, Laura Hall, Carol
