### GENERAL

CMF furnaces are high quality, direct vent furnaces used for manufactured housing, rec-

reational vehicle, and residential\* applications. These furnaces are offered in either power gas (designated by PG) or power oil (designated by PO) models. The power gas models are designed for operation with either natural or propane (LP) gas.

The CMF series is convertible from power oil to power gas, and vice versa. Furthermore, the firing rate of the CMF80 Convertible Series can be changed using a certified NORDYNE conversion kit field-installed by a qualified service technician. Refer to the "Firing Rate-Conversion" section later in these instructions for more information on the firing rate change.

These furnaces are certified to the UL307 standards (UL 307A for oil models; UL 307B for gas models), and can be installed in a variety of applications, as shown in Table 1. This furnace is not to be used for temporary heating of buildings or structures under construction.

### WARNING:

This furnace must be installed by a qualified installing agency and in accordance with applicable local codes and ordinances that govern this type of equipment. Failure to properly install the furnace, base assembly, and venting system as described herein may damage the equipment and/or the home, can create a fire or asphyxiation hazard, violates U.S. listing requirements, and will void the warranty. This furnace is NOT approved for installation with split system air conditioning. Use a NORDYNE packaged air conditioning system.
