

Wk 1: basics

Computer parts

- Hard drive stores data = grocery store
- RAM temp stores it = pantry
- Processor uses RAM = stove
 - P uses RAM b/c faster than using HD. can't just use RAM w/out HD b/c RAM loses memory when turned off and has less avail space
 - Reads binary

Programming languages: high to low level: pseudo > high > assembly > machine

- High level
 - Scripting: python perl javascript
 - Object oriented: C# C++ Java
 - Math: matlab, R
 - procedural/structured: C, Fortran, BASIC, Pascal
- Assembly
 - Java bytecode for JVM
- Machine
 - Binary
 - Machine code
 - Executable code

High level → compiler converts code into executable form → lower form → interpreter translates while running program

Java compiled by Javac to bytecode → interpreted and run by JVM java virtual machine

Why is java universal?

- For most languages, compiler's executable only works on specific processor
- Javac compiles Java into a special portable executable, bytecode, that works on many dif devices. Each device has its own JVM which can execute/interpret bytecode

Programming phases

- Define & analyze, design, write code, test code, documentation, maintain/upgrade

3 types of program control

- Sequential (default)
- Decision
- Repetition (loops)
- ALL general purpose programming languages must have ways to do these 3 things

Sample run: what appears on the screen, including system printed output and your input

Pseudocode: non-coding version of code

Pseudocode tracing: following through pseudocode on paper

Human-Computer Interaction Steve Howard,Judy Hammond,Gitte Lindgaard,2013-06-05 The theme of the 1997 INTERACT conference Discovering New Worlds of HCI signals major changes that are taking place with the expansion of new technologies into fresh areas of work and leisure throughout the world and new pervasive powerful systems based on multimedia and the internet HCI has a vital role to play in these new worlds to ensure that people using the new technologies are empowered rather than subjugated to the technology that they increasingly have to use In addition outcomes from HCI research studies over the past 20 years are now finding their way into many organisations and helping to improve and enhance work practices These factors have strongly influenced the INTERACT 97 Committee when creating the conference programme with the result that besides the more traditional HCI research and education focus found in previous INTERACT conferences one strand of the 1997 conference has been devoted to industry and another to multimedia The growth in the IFIP TC13 committee itself reflects the expansion of HCI into new worlds Membership of IFIP TC13 has risen to now include representatives of 24 IFIP member country societies from many parts of the world In 1997 IFIP TC13 breaks new ground by holding its sixth INTERACT

conference in the Asia Pacific region This is a significant departure from previous INTERACT conferences that were all held in Europe and is especially important for the Asia Pacific region as HCI expands beyond its traditional base
