**Introductory Accounting** Daniel P. Tinkelman, 2015-12-22. Introductory Accounting adopts a measurement approach to teaching graduate students the basics of accounting. Integrating both financial and managerial principles from the U.S. and around the globe, it links accounting to other areas of business such as finance, operations, and management. Providing students with the context to understand how and why accounting is a valuable part of business, readers will gain an understanding of accounting's role in financial analysis and managerial decision making. Tinkelman discusses accounting as an imperfect measurement system, offering guidance on how quantitative data can benefit analysts and managers when used with an understanding of its limitations. The book is strongly grounded in research and also draws on plenty of examples and cases to bring these issues to life. The conversational style of Introductory Accounting will appeal to MBA students, while key terms and illustrative problems make assignments easy for instructors. Additional materials for students and instructors are available on the book's companion website.

Edmonds,2020-01-07 Learning Financial Accounting can often feel like learning a foreign language to students Before students even grasp the underlying concepts of Accounting they are immersed in unfamiliar terms and before students fully realize the purpose of financial statements they are asked to make detailed recording procedures This early emphasis on terminology and recording can be a struggle for non accounting majors to see the relevancy leading to increased dropouts and higher failure rates This creates a challenge for Financial Accounting instructors who must balance the need to engage

and retain non majors while fully preparing Accounting majors for the next level The authors of Introductory Financial Accounting for Business offer a solution emphasizing an analytical approach to Accounting teaching students to think like business professionals and speak in terms of bottom line consequences How will a given transaction impact my overall business How can I make better business decisions whether I m an accountant manager or entrepreneur Business leaders are demanding that new graduates have these critical thinking skills in order to handle a rapidly changing modern business environment Today s students will encounter new technological advances in automated data capture data analytics and artificial intelligence processes that are automating traditional recording procedures Rather than tallying transactions students will be required to analyze and interpret data making decisions early and often and thinking like business professionals The Edmonds Olds team s fresh approach and modern pedagogy helps prepare students for their business careers
