sulfur photosynthetic bacteria, use hydrogen sulfide (H_2S) instead of water.

10. How are bacteria classified according to their need for oxygen?

According to their necessity of oxygen bacteria are classified into anaerobic (those that survive without oxygen) and aerobic (those that do not survive without oxygen).

11. What is meant when it is said that a bacteria is an obligate anaerobe?

Obligate anaerobes are those living beings that do not survive in the presence of oxygen. For example, the bacteria *Clostridium tetani*, agent of tetanus, is an obligate anaerobe.

In superficial wounds, it is common to use hydrogen peroxide to expose anaerobic microorganisms to oxygen and kill them.

12. According to their morphology how are bacteria classified?

Bacteria present different morphological patterns. A bacterium can be classified into coccus, bacillus, vibriion or spirochete.

13.

What is the main constituent of the cell wall of bacteria?

The bacterial cell wall is made of peptidoglycans.

14. Which are the intracellular organelles present in bacteria?

Considering typical eukaryotic cell organelles, heterotrophic bacteria have ribosomes, essential for protein synthesis.

15. What are plasmids? What is the importance of plasmids for the recombinant DNA technology?

Plasmids are circular fragments of DNA that are accessories to the main bacterial DNA. Plasmids are important for genetic engineering because genes from other organisms are inserted into them to produce recombinant beings, for example, mutant bacteria. These bacteria are made, for example, to produce utile proteins for humans on an industrial scale.

16. How do bacteria reproduce?

Bacteria reproduce by binary fission (scissiparity). Some bacteria however present a kind of sexual reproduction

Invasive and Introduced Plants and Animals Ian D. Rotherham, Robert A. Lambert, 2012-12-06 There have been many well publicized cases of invasive species of plants and animals often introduced unintentionally but sometimes on purpose causing widespread ecological havoc Examples of such alien invasions include pernicious weeds such as Japanese knotweed an introduced garden ornamental which can grow through concrete the water hyacinth which has choked tropical waterways and many introduced animals which have out competed and displaced local fauna This book addresses the broader context of invasive and exotic species in terms of the perceived threats and environmental concerns which surround alien species and ecological invasions As a result of unprecedented scales of environmental change combined with rapid

globalisation the mixing of cultures and diversity and fears over biosecurity and bioterrorism the known impacts of particular invasions have been catastrophic However as several chapters show reactions to some exotic species and the justifications for interventions in certain situations including biological control by introduced natural enemies rest uncomfortably with social reactions to ethnic cleansing and persecution perpetrated across the globe The role of democracy in deciding and determining environmental policy is another emerging issue In an increasingly multicultural society this raises huge questions of ethics and choice At the same time in order to redress major ecological losses the science of reintroduction of native species has also come to the fore and is widely accepted by many in nature conservation However with questions of where and when and with what species or even species analogues reintroductions are acceptable the topic is hotly debated Again it is shown that many decisions are based on values and perceptions rather than objective science Including a wide range of case studies from around the world his book raises critical issues to stimulate a much wider debate Microbiology and Toxicology Mr. Rohit Manglik, 2024-03-04 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels **Microbiology MCQ (Multiple Choice Questions)** Arshad Iqbal, The Microbiology Multiple Choice Questions MCQ Quiz with Answers PDF Microbiology MCQ PDF Download Quiz Questions Chapter 1 16 Practice Tests with Answer Key Medical Microbiology Questions Bank MCQs Notes includes revision guide for problem solving with hundreds of solved MCQs Microbiology MCQ with Answers PDF book covers basic concepts analytical and practical assessment tests Microbiology MCQ PDF book helps to practice test questions from exam prep notes The Microbiology MCQs with Answers PDF eBook includes revision guide with verbal quantitative and analytical past papers solved MCQs Microbiology Multiple Choice Questions and Answers MCQs PDF Free download chapter 1 a book covers solved quiz questions and answers on chapters Basic mycology classification of medically important bacteria classification of viruses clinical virology drugs and vaccines genetics of bacterial cells genetics of viruses growth of bacterial cells host defenses and laboratory diagnosis normal flora and major pathogens parasites pathogenesis sterilization and disinfectants structure of bacterial cells structure of viruses vaccines antimicrobial and drugs mechanism tests for college and university revision guide Microbiology Quiz Questions and Answers PDF free download eBook s sample covers beginner s solved questions textbook s study notes to practice online tests The book Microbiology MCQs Chapter 1 16 PDF includes medical school question papers to review practice tests for exams Microbiology Multiple Choice Questions MCQ with Answers PDF digital edition eBook a study guide with textbook chapters tests for ASCP NRCM MD MBChB MBBS MBChB BM competitive exam Microbiology Mock Tests Chapter 1 16 eBook covers problem solving exam tests from microbiology textbook and practical eBook chapter wise as Chapter 1 Basic Mycology MCQ Chapter 2 Classification of Medically important Bacteria MCQ Chapter 3 Classification of
