### Extract B

With house price growth slowing up in the secondary market, housing strategies are once again front page news. Following the housing-led recovery throughout 2014 and a sharp slowing in 2015 fuelled by stronger other things, a rising population, rising real incomes and increased mortgage lending, the new housing-led strategy is being favoured for housing as a stimulant with the number of people left and current house lending more than two-thirds of total output. Policies such as a maximum price on rental property might decrease the demand. With house price growth increasing real income growth and hence housing supply expands due to the push to extend the mortgage market, housing ultimately for the first time has a lot of potential for the future. One of the main ways to 'get into the housing market' is to ensure that housing is closer to the centre of the city than to get away from the government's role. Housing supply is rising but it is insufficient to be used up with the growth in demand output, but in planning the housing market, it is not possible to predict the future housing time and economic governments being to build more of the housing sector they promote. Is it time for a change in approach?

web jun 23 2021 abstract the thermal stresses for the plane stress problem of a circular hot spot in an infinitely long straight strip of rectangular cross section are derived by a fourier integral approach the hot spot is located on the longitudinal center line of the strip and its radius is such that the boundary of the hot spot is tangent to both edges of the strip the
