Proceedings [of The] Conference on Tall Buildings, December 1974, Kuala Lumpur, Malaysia, 1975 **Foundation of Software Science and Computation Structures** Jerzy Tiuryn, 2000-03-15

ETAPS 2000 was the third instance of the European Joint Conferences on Theory and Practice of Software ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences This year it comprised the conferences FOSSACS FASE ESOP CC TACAS and satellite workshops CBS CMCS CoFI GRATRA INT seven invited lectures a panel discussion and ten tutorials The events that comprise ETAPS address various aspects of the system development process including specification design implementation analysis and improvement The languages methodologies and tools which support these activities are all well within its scope The event blends of theory and practice are represented with an inclination towards theory with a practical motivation on one hand and soundly based practice on the other Many of the issues involved in software design apply to systems in general including hardware systems and the emphasis on software is not intended to be exclusive ETAPS is a loose confederation in which each event retains its own identity with a separate

program committee and independent proceedings Its format is open ended allowing it to grow and evolve as time goes by Contributed talks and system demonstrations are in synchronized parallel sessions with invited lectures in plenary sessions Two of the invited lectures are reserved for u fying talks on topics of interest to the whole range of ETAPS attendees

English Mechanic and World of Science ,1889 **Stability and Ductility of Steel Structures (SDSS'99)** D.

Dubin&acaron;,M. Iványi,1999-08-03 With the gradual development of rules for designing against instability the idea emerged in London in 1974 to hold an International Colloquium treating every aspect of structural instability of steel structures There have been 17 International Colloquia Stability Sessions around the world starting with the first one in Paris in 1972 until with the last one in Nagoya in 1997 In Nagoya it was decided to continue the series of travelling colloquia by launching the Sixth Colloquium in September 1999 with the First Session to be held at the Politehnica University of Timi oara Rom nia which will be followed by another in the year 2000 at the Gediminas Technical University in Vilnius Lithuania a third one during SSRC s Year 2000 Annual Meeting in the US and a fourth one in Australia or New Zealand At present important research projects are in progress around the world like SAC Joint Venture Project in USA INCO COPERNICUS RECOS in Europe and others which are devoted to improve and develop new methods for the safety design of steel structures in seismic zones Special attention is paid in Europe USA and Japan to improve the design codes and detailing of seismic resistant steel structures This was the reason to organise the Session of Nagoya as Stability and Ductility of Steel Structures Colloquium Romania is also a strong seismic territory and therefore the topic of the Timi oara Session covered both stability and ductility problems The technical programme of the SDSS 99 Colloquium in Timi oara has been split into nine working sessions

Seismic Design, Assessment and Retrofitting of Concrete Buildings Michael N. Fardis,2009-07-25 Reflecting the historic first European seismic code this professional book focuses on seismic design assessment and retrofitting of concrete buildings with thorough reference to and application of EN Eurocode 8 Following the publication of EN Eurocode 8 in 2004 05 30 countries are now introducing this European standard for seismic design for application in parallel with existing national standards till March 2010 and exclusively after that Eurocode 8 is also expected to influence standards in countries outside Europe or at the least to be applied there for important facilities Owing to the increasing awareness of the threat posed by existing buildings substandard and deficient buildings and the lack of national or international standards for assessment and retrofitting its impact in that field is expected to be major Written by the lead person in the development of the EN Eurocode 8 the present handbook explains the principles and rationale of seismic design according to modern codes and provides thorough guidance for the conceptual seismic design of concrete buildings and their foundations It examines the experimental behaviour of concrete members under cyclic loading and modelling for design and analysis purposes it develops the essentials of linear or nonlinear seismic analysis for the purposes of design assessment and retrofitting especially using Eurocode 8 and gives detailed guidance for modelling concrete buildings at the member and at the system

level Moreover readers gain access to overviews of provisions of Eurocode 8 plus an understanding for them on the basis of the simple models of the element behaviour presented in the book Also examined are the modern trends in performance and displacement based seismic assessment of existing buildings comparing the relevant provisions of Eurocode 8 with those of new US prestandards and details of the most common and popular seismic retrofitting techniques for concrete buildings and guidance for retrofitting strategies at the system level Comprehensive walk through examples of detailed design elucidate the application of Eurocode 8 to common situations in practical design Examples and case studies of seismic assessment and retrofitting of a few real buildings are also presented From the reviews This is a massive book that has no equal in the published literature as far as the reviewer knows It is dense and comprehensive and leaves nothing to chance It is certainly taxing on the reader and the potential user but without it use of Eurocode 8 will be that much more difficult In short this is a must read book for researchers and practitioners in Europe and of use to readers outside of Europe too This book will remain an indispensable backup to Eurocode 8 and its existing Designers Guide to EN 1998 1 and EN 1998 5 published in 2005 for many years to come Congratulations to the author for a very well planned scope and contents and for a flawless execution of the plan AMR S ELNASHAI The book is an impressive source of information to understand the response of reinforced concrete buildings under seismic loads with the ultimate goal of presenting and explaining the state of the art of seismic design Underlying the contents of the book is the in depth knowledge of the author in this field and in particular his extremely important contribution to the development of the European Design Standard EN 1998 Eurocode 8 Design of structures for earthquake resistance However although Eurocode 8 is at the core of the book many comparisons are made to other design practices namely from the US and from Japan thus enriching the contents and interest of the book EDUARDO C CARVALHO
