Blank, Ellen M. Pechman, 1995 A majority of states are now involved in developing revising and implementing state frameworks in mathematics science and other core subjects The Council of Chief State School Officers completed a one year study of 60 current state curriculum frameworks in mathematics and science The purposes of this study were to define and describe state mathematics and science curriculum frameworks evaluate the role of frameworks in systemic reform and assist states with development of new frameworks Chapters in this report reflect key aspects of the design of the study including 1 a survey of states to identify frameworks and collect information about state context 2 a content analysis of key elements of the frameworks using definitions and categories developed in the study and 3 a qualitative review of specific aspects of recent frameworks by teams of experts The value of frameworks is as follows one half of frameworks link content to teacher professional development frameworks can provide a rationale for use of technology and tools in classrooms frameworks can help explain an approach to systemic reform and frameworks can assist schools in evaluating curriculum organization and resources Appendices include Elements for Analyzing State Curriculum Frameworks Definitions of Categories and Concepts for Conceptual Mapping of State Frameworks Questions for a Qualitative Analysis of State Frameworks in Mathematics and Science and Sample Vignettes Contains 34 references MKR *English Mechanic and Mirror of Science and Art*, 1922 Everyday Thoughts about Nature W.W. Cobern, 2000-06-30 Dr Olcbee Lee School of Education University of Miami Coral Gables Florida 33124 I remember my excitement and appreciation several years ago when I first read *World View Theory and Science Education Research* by Bill Cobern 1991 It was a comprehensive theoretical discussion of worldview theory in science education I am delighted to see that Cobern has taken the next step to provide empirical accounts of worldview in *Everyday Thoughts about Nature* The primary goal of the book is to understand how typical ninth grade students and their science teachers think about Nature or the natural world and how their thoughts are related to science In pursuing this goal the book raises a basic question about the purpose of science education for the public Should science education seek to educate scientific thinkers in the pattern of the science teachers Or should science education seek to foster sound science learning within the matrices of various cultural perspectives p 3 The answer to this question becomes clear thanks to Cobern's excellent research and persuasive arguments First this research takes a humanistic approach in understanding what students and teachers think about Nature through the language and ideas voluntarily expressed p I The research used multi-directional prompts and encouraged students and teachers to speak freely and at length in any directions they wished This humanistic approach is stated clearly The research seeks to illuminate some of the various ways in which students think about Nature without judging even the most unorthodox perspectives p 14 Catalog of Copyright Entries, Third Series
