Resources in Education ,1993 **Making it tangible. Learning outcomes in science education** Sascha Bernholt,Knut Neumann,Peter Nentwig,2012 One of the central features in current educational reforms is a focus on learning outcomes Many countries have established or revised standards to describe what teachers are supposed to teach and students are expected to learn More recently the emphasis has shifted to considerations of how standards can be operationalized in order to make the outcomes of educational efforts more tangible This book is the result of a symposium held in Kiel that was arranged by two science education groups one at the IPN Leibniz Institute for Science and Mathematics Education at the University of Kiel in Germany and the other at the University of York UK The seminar brought together renowned experts from 12 countries with different notions of the nature and quality of learning outcomes The aim was to clarify central conceptions and approaches for a better understanding among the international science education community The book is divided into five parts In Part A the organizers set the scene describing the rationale for arranging the symposium Part B provides a broad overview about different approaches challenges and pitfalls on the road to the clarification of meaningful and fruitful learning outcomes The set of papers in Part C provides deep insights into different although comparable approaches which aim to frame to assess and to promote learning and learning outcomes in science education Smaller projects are presented as well as broad coordinated national programs The papers in Part D outline the individual historical development from different national perspectives reflecting the deficits and problems that led to current reforms Finally a summary of the organizers analyses the conclusions from different vantage points *Semiotic Approaches in Science Didactics* Catherine Houdement,Cécile de Hosson,Christophe Hache,2022-11-01 The sciences are in essence highly semiotized Our ways of thinking and communicating about science are based on permanent transformations from one system of signs to another such as scriptural graphic symbolic oral and gestural signs The semiotic focus studied in this book makes it possible to grasp part of the complexity of teaching and learning phenomena by focusing on the variety of possible interpretations of the signs that circulate within the science classroom *Semiotic Approaches in Science Didactics* brings together contributions from didactic research involving various disciplines such as mathematics chemistry physics and geography which mobilize different types of semiotic support It offers the key to understanding and even reducing some of the misunderstandings that can arise between a speaker and a receiver in scientific teaching situations **Ethiopia** ,1998-01-01 After being immersed in almost three decades of civil conflict the prevailing peace and political stability in

Ethiopia allowed its government to focus on rebuilding its economy As an integral part of this undertaking the Federal Democratic Republic of Ethiopia is seeking to overhaul the landscape of human capital development in the country This report discusses the situation and trends in education health nutrition and population It also examines the barriers to improvement from the points of view of Ethiopian households and public and private suppliers of services It also attempts to identify the means by which the government can use public resources more effectively
