 The World of Science Education reviews research in a key region of the world These regions include North America South  
 and Latin America Asia Australia and New Zealand Europe and Israel Arab States and Sub Saharan Africa The focus of this  
 Handbook is on science education in Asia and the scholarship that most closely supports this program The reviews of the  
 research situate what has been accomplished within a given field in an Asian rather than an international context The  
 purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education  
 The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of  
 problems and solutions within regional contexts The approach allows readers to review what has been done and  
 accomplished what is missing and what might be done next      *Telegraphic Journal and Monthly Illustrated Review of
