Hegedus,Jeremy Roschelle,2012-12-16 This volume provides essential guidance for transforming mathematics learning in
schools through the use of innovative technology pedagogy and curriculum It presents clear rigorous evidence of the impact
technology can have in improving students learning of important yet complex mathematical concepts and goes beyond a
focus on technology alone to clearly explain how teacher professional development pedagogy curriculum and student
participation and identity each play an essential role in transforming mathematics classrooms with technology Further
evidence of effectiveness is complemented by insightful case studies of how key factors lead to enhancing learning including
the contributions of design research classroom discourse and meaningful assessment The volume organizes over 15 years of
sustained research by multiple investigators in different states and countries who together developed an approach called
SimCalc that radically transforms how Algebra and Calculus are taught The SimCalc program engages students around
simulated motions such as races on a soccer field and builds understanding using visual representations such as graphs and
familiar representations such as stories to help students to develop meaning for more abstract mathematical symbols Further

the SimCalc program leverages classroom wireless networks to increase participation by all students in doing talking about and reflecting on mathematics Unlike many technology programs SimCalc research shows the benefits of balanced attention to curriculum pedagogy teacher professional development assessment and technology and has proven effectiveness results at the scale of hundreds of schools and classrooms Combining the findings of multiple investigators in one accessible volume reveals the depth and breadth of the research program and engages readers interested in Engaging students in deeply learning the important concepts in mathematics Designing innovative curriculum software and professional development Effective uses of technology to improve mathematics education Creating integrated systems of teaching that transform mathematics classrooms Scaling up new pedagogies to hundreds of schools and classrooms Conducting research that really matters for the future of mathematics learning Engaging students in deeply learning the important concepts in mathematics Designing innovative curriculum software and professional development Effective uses of technology to improve mathematics education Creating integrated systems of teaching that transform mathematics classrooms Scaling up new pedagogies to hundreds of schools and classrooms Conducting research that really matters for the future of mathematics learning
