

MAPWORK GRADE 12 NOTES - GEOGRAPHY STUDY GUIDES

5.1 Introduction

Mapwork is a practical section of Geography where you are required to apply all the different skills, techniques and the theory that you have learnt. It consists of the following sections:

- Mapwork calculations
- Reading, interpretation and analysis of theory
- Geographical Information Systems (GIS)

Maps tell you a story about a place. Look at all the information given on the map to interpret it:

- What is the name on the top of the map?
- Look at the latitude and longitude. Get an idea where the map is. For example, 20°S would indicate it is in Limpopo.
- Look at all the information provided (magnetic declination information, scale of the map, contour interval, map projection used) in the 'margins' of the map.
- Look at the bottom of the map, for the diagram showing the map sheet reference. It may show additional information such as oceans or borders.
- Notice where roads or railways go off the map. The town they lead to may give you clues.
- Make use of the key/reference list to identify features. Remember, the first word in the reference list refers to the first picture and not both pictures.

Look for the following aspects on the map:

- Is this a high or low rainfall area? Is the rainfall seasonal?
- What kinds of rivers are visible and how many are there?
- Identify the urban and rural areas.
- Identify the different land uses in the mapped area, for example, agricultural/industrial/built-up areas.
- What factors may have affected the location of various land uses? For example, industry alongside a perennial river.
- Identify the type of farming – is it commercial or subsistence?
- Look at the relief – is it flat or hilly, are the slopes steep or gentle?
- Look at the contour lines to determine this.

Look at the information given in the orthophoto:

- Is the orthophoto labelled? If not, check the numbers or letters in the question, for example: 'Identify land use labelled G on orthophoto' – G will only be on one of the photos.
- Is a rectangle drawn around the area covered by the orthophoto? If not, orientate the photo to the map.
- Read the instructions carefully as you may need to use both the map and the photograph to answer a question.
- Make use of all the information on the orthophoto, for example, road names, heights, etc.
