Postpositivist International Relations Theory Amartya Mukhopadhyay, 2023-10-16 This book discusses postpositivist theories foregrounding postpositivism against the reigning realist and positivist pluralist orthodoxies The book explicates seven theories not as disparate endeavours but as developments linked by a common thread that seeks to enunciate globalist emancipatory goals for the theoretical field and the world that these theories seek to change It focuses on the following themes feminism environmentalism or green theory the English School critical theory constructivism postmodernism and postcolonialism Additionally a separate chapter on globalization shows that while mainstream neo realist international relations theories respond hostilely to globalization and liberal pluralist theories react benignly to it postpositivist theories positively welcome it The book offers a competent meta theoretical gridwork showing on which side of the opposing disciplinary positions in the fourth debate each of the seven theories are located It is a comprehensive guide to the postpositivist restructuring of the discipline of international relations This book will be of interest to researchers and students of political science international relations history humanities and literature

Kaufman, 2018 This clear and concise text introduces the theoretical frameworks that form the foundation of international relations Using levels of analysis as the primary unifying force Kaufman also assesses what traditional approaches can't explain about the contemporary international system

The Concept of Truth in International Relations Theory Matthew Fluck, 2017-04-12 This book charts the role played by conceptions of truth in the development of a critical tradition of International Relations theory Providing a detailed account of the conceptions which have shaped the work of Critical Theorists and Poststructuralists the book reaffirms the importance of epistemic reflection for the discipline It argues that the partially abstract character of the main strands of critical IR arises not from their concern with epistemic matters

but from their insistence that truth is purely intersubjective Drawing on the philosophy of Theodor Adorno the book argues that IR's critical tradition can be rejuvenated by combining its original politicisation of truth with a critical account of its objectivity The book will be a valuable resource for scholars and graduate students interested in the future of critical International Relations theory The NGO Challenge for International Relations Theory William E. DeMars, Dennis Dijkzeul, 2015-02-11 It has become commonplace to observe the growing pervasiveness and impact of Non Governmental Organizations NGOs And yet the three central approaches in International Relations IR theory Liberalism Realism and Constructivism overlook or ignore the importance of NGOs both theoretically and politically Offering a timely reappraisal of NGOs and a parallel reappraisal of theory in IR the academic discipline entrusted with revealing and explaining world politics this book uses practice theory global governance and new institutionalism to theorize NGO accountability and analyze the history of NGOs This study uses evidence from empirical data from Europe Africa Latin America the Middle East and Asia and from studies that range across the issue areas of peacebuilding ethnic reconciliation and labor rights to show IR theory has often prejudged and misread the agency of NGOs Drawing together a group of leading international relations theorists this book explores the frontiers of new research on the role of such forces in world politics and is required reading for students NGO activists and policy makers International Relations, Political Theory, and the Problem of Order Nicholas J. Rengger, 2000 This book seeks to offer a general interpretation and critique of both methodological and substantive aspects of International theory The New Constructivism in International Relations Theory David M. McCourt, 2023-06-13 Tracing constructivist work on culture identity and norms within the historical geographical and professional contexts of world politics this book makes the case for new constructivist approaches to international relations scholarship **Critical Theories in International Relations** Tayyar Ari, 2023-04-04 This edited book focuses primarily on contemporary debates and the critical and postmodern theories to be considered a significant contribution to the field This book shows that critical international relations theories which are incomprehensible and challenging are easy and understandable The book analyzes the Frankfurt School constructivism post colonialism feminism critical geopolitics political economy Copenhagen School Aberystwyth School Paris School and Ontological security Critical Theories in International Relations argues that neither identity nor security can be considered a fixed and objective issue can change according to time and space and depend on historical and sociological factors Nothing is given for critical approaches and they are produced and reproduced in ever changing conditions that lead to new truths and meanings These are the results of reflexive and non linear interactions In this context it is made pedagogically understandable to the readers within this framework *Winning the Peace* Andrew Carr, 2015-01-05 *Winning the Peace* seeks to explore and explain how Australian governments during the modern period of Australia's engagement with Asia from 1983 till today have attempted to use their defence and foreign policies to shape the region While there were certainly times of tension during this period such as the spikes around the end of the Cold War and

during the early years of the War on Terror the region has been largely defined by peace Because of this peace and thanks to Australia's relative size as a middle power the government's attempt to change how other states act and think was not sought through the deployment or use of force but through military and diplomatic engagement and persuasion Australia's smaller size also meant it had to be strategic in its efforts It had to determine which changes were priorities it had to reorganise and develop its resources it had to deploy them effectively and efficiently and it had to be able to sustain the effort in the face of competition and rejection This book focuses on the three main campaigns the Australian government has undertaken since the early 1980s to reshape the Asia Pacific in pursuit of its national interests

Racism, Diplomacy, and International Relations Ko Unoki, 2022-02-21 Unoki addresses the significance of racism in international relations by focusing on its conception as a doctrine and its interrelationship with imperialism its doctrinal role in the development of the discipline of International Relations IR and various episodes from Western and Asian history in which racism had affected state behavior and the practice of diplomacy The creation of empires that oppressed indigenous peoples the two World Wars and the campaigns of ethnic cleansing and genocide that accompanied these wars and other conflicts and international movements calling for the elimination of racial discrimination attest to the impact racial prejudice or racism has had on international relations Despite this history racism's relevance is seldom mentioned in IR courses offered in universities or IR textbooks Instead IR scholars have often explained the behavior of states using the framework of theories that highlight variables and themes such as power fear and the search for security in an anarchic world Unoki demonstrates that racism has not only substantially influenced the course of international relations but that it continues to do so in the 21st century making it imperative that policymakers are aware of racism's deleterious legacy A vital resource for students policymakers and those who are interested in building a more tolerant and just world

International Relations and American Dominance Helen Louise Turton, 2015-11-19 This work seeks to explore the widely held assumption that the discipline of International Relations is dominated by American scholars approaches and institutions It proceeds by defining dominance along Gramscian lines and then identifying different ways in which such dominance could be exerted agenda setting theoretically methodologically institutionally gate keeping Turton dedicates a chapter to each of these forms of dominance in which she sets out the arguments in the literature discusses their theoretical implications and tests for empirical support The work argues that the self image of IR as an American dominated discipline does not reflect the state of affairs once a detailed sociological analysis of the production of knowledge in the discipline is undertaken Turton argues that the discipline is actually more plural than widely recognized challenging widely held beliefs in International Relations and it taking a successful step towards unpacking the term dominance An insightful contribution to the field this work will be of great interest to students and scholars alike

Religion and the Realist Tradition Jodok Troy, 2013-09-11 This volume picks up a rather uninvested field of international relations theory the influence of religion on Realism as well as the power of Realism to address religious issues in world politics Although classical scholars of Realism rarely mention religion explicitly in their well known work this volume suggests that Realism offers serious ground for taking religion and faith into account as well as evaluating the impact of religion on its theoretical framework how religion and religious worldviews influence and affect the theoretical framework of Realism and how Realism approach religious issues in international relations as a relatively new field of international studies Although international relations scholars now widely deal with issues of religion large portions of the theoretical underpinning are missing In addressing this lack the volume illustrates the possibility of reform and change in Realism Furthermore the chapters reach out to normative statements The contributors offer a theoretical view on religion in international relations in the context of Realism but always connect this with actual real world related political problems The volume takes into account not only classical thinkers and approaches of Realism but also present day authors dealing with ethical and normative questions of international relations in the aftermath

of 9 11 Offering a fresh perspective on the influence of religion on international relations theory this work will be of great interest to scholars of religion and international relations international relations theory and political philosophy *Thinking Globally About World Politics: Beyond Global IR* Pinar Bilgin, Karen Smith, 2024-07-13 This book asks what it means to think globally about world politics In an attempt to contextualise the recent globalising turn in International Relations IR it takes stock of more than 30 years of efforts at addressing IR s Eurocentric limitations and explores what thinking globally means in practice through focusing on the study of international security and foreign policy The authors offer thinking globally about world politics not as an alternative to but as a critical engagement with IR It involves curiosity about what others think about the world making a sustained effort to locate the knowledge they have produced and recognising past and present contributions to what we otherwise view as European ideas practices and institutions Rather than focusing on abstract debates about the state of the discipline the aim is to provide researchers with the conceptual tools to think globally and design their own research projects
