makers have understood and responded to the problem of internet addiction in their societies Is the internet good or bad for  
society American analysts like Lessig and Zittrain suggest that the internet is inherently liberating and positive for society  
while Morozov and Sageman warn that the internet poses risks to citizens and societies Using a comparative framework to  
illustrate how the two states differ in their assessments of the risks to citizens posed by the introduction of new technology  
Mary Manjikian compellingly argues that both risk and disease are ideas which are understood differently at different  
historic periods and in different cultures Her culturalist approach claims that the internet is neither inherently helpful nor  
inherently threatening Rather its role and the dangers it poses may be understood differently by different societies Is the

internet good or bad for society The answer it appears is it depends
