**Routledge Handbook of Space Law** Ram Jakhu, Paul Stephen Dempsey, 2016-11-10 This handbook is a reference work providing a comprehensive objective and comparative overview of Space Law. The global space economy reached 330 billion in 2015 with a growth rate of 9 per cent vis vis the previous year. Consequently Space Law is changing and expanding expeditiously especially at the national level. More laws and regulations are being adopted by space faring nations while more countries are adapting their Space Laws and regulations related to activities in outer space. More regulatory bodies are being created while more regulatory diversity from public law to private law is being instituted as increasing and innovative activities are undertaken by private entities which employ new technologies and business initiatives. At the international level Space Law both hard law and soft law is expanding in certain areas especially in satellite broadcasting and telecommunications. The Routledge Handbook of Space Law summarises the existing state of knowledge on a comprehensive range of topics and aspires to set the future international research agenda by indicating gaps and inconsistencies in the existing law and highlighting emerging legal issues. Unlike other books on the subject it addresses major international and national legal aspects of particular space activities and issues rather than providing commentary on or explanations about a particular Space Law treaty or national regulation. Drawing together contributions from leading academic scholars and practicing lawyers from around the world the volume is divided into five key parts: Part I General Principles of International Space Law; Part II International Law of Space Applications; Part III National Regulation of Space Activities; Part IV National Regulation of Navigational Satellite Systems; Part V Commercial Aspects of Space Law. This handbook is both practical and theoretical in scope and may serve as a reference tool to academics, professionals and policy makers with an interest in Space Law.

*Maritime Law* Yvonne Baatz, 2020-10-29 Now in its fifth edition this authoritative guide covers all of the core aspects of maritime law in one distinct volume. *Maritime Law* is written by a team of leading academics and practitioners each expert in their own field. Together they provide clear, concise and fully up to date coverage of topics ranging from bills of lading to arrest of ships, all written in an accessible and engaging style. As English law is heavily relied on throughout the maritime world this book is grounded in English law whilst continuing to analyse the key international conventions currently in force. Brand new coverage includes The impact of the European Union Withdrawal.

Agreement Act 2020 which amends the European Union Withdrawal Act 2018 Over one hundred new cases from the English courts the Court of Justice of the European Union and the International Tribunal for the Law of the Sea Changes to the Merchant Shipping Registration of Ships Regulations 1993 including the Merchant Shipping Registration of Ships Amendment EU exit Regulations 2019 Discussion of the Incoterms 2020 which are available for incorporation into sale contracts from 1 January 2020 Updates on litigation and amendments to the Admiralty Civil Procedure Rules This book is a comprehensive reference source for students academics and legal practitioners worldwide especially those new to maritime law or a particular field therein

*Making One's Way in the World* Martin Bell, 2020-02-28 The book draws on the evidence of landscape archaeology palaeoenvironmental studies ethnohistory and animal tracking to address the neglected topic of how we identify and interpret past patterns of movement in the landscape It challenges the pessimism of previous generations which regarded prehistoric routes such as hollow ways as generally undatable The premise is that archaeologists tend to focus on sites while neglecting the patterns of habitual movement that made them part of living landscapes Evidence of past movement is considered in a multi scalar way from the individual footprint to the long distance path including the traces created in vegetation by animal and human movement It is argued that routes may be perpetuated over long timescales creating landscape structures which influence the activities of subsequent generations In other instances radical changes of axes of communication and landscape structures provide evidence of upheaval and social change

Palaeoenvironmental and ethnohistorical evidence from the American North West coast sets the scene with evidence for the effects of burning animal movement faeces deposition and transplantation which can create readable routes along which are favoured resources Evidence from European hunter gatherer sites hints at similar practices of niche construction on a range of spatial scales On a local scale footprints help to establish axes of movement the locations of lost settlements and activity areas Wood trackways likewise provide evidence of favoured patterns of movement and past settlement location Among early farming communities alignments of burial mounds enclosure entrances and other monuments indicate axes of communication From the middle Bronze Age in Europe there is more clearly defined evidence of trackways flanked by ditches and fields Landscape scale survey and excavation enables the dating of trackways using spatial relationships with dated features and many examples indicate long term continuity of routeways Where fields flank routeways a range of methods including scientific approaches provide dates Prehistorians have often assumed that Ridgeways provided the main axes of early movement but there is little evidence for their early origins and rather better evidence for early routes crossing topography and providing connections between different environmental zones The book concludes with a case study of the Weald of South East England which demonstrates that some axes of cross topographic movement used as droveways and generally considered as early medieval can be shown to be of prehistoric origin One reason that dryland routes have proved difficult to recognise is that insufficient attention has been paid to the parts played by riverine and maritime longer distance

communication It is argued that understanding the origins of the paths we use today contributes to appreciation of the distinctive qualities of landscapes Appreciation will help to bring about effective strategies for conservation of mutual benefit to people and wildlife by maintaining and enhancing corridors of connectivity between different landscape zones including fragmented nature reserves and valued places In these ways an understanding of past routeways can contribute to sustainable landscapes communities and quality of life

**Merkin and Flannery on the Arbitration Act 1996** Robert Merkin, Louis Flannery QC, 2019-11-21 This book is an essential resource for anybody involved in arbitration It is an updated section by section commentary on the Arbitration Act 1996 split into a separate set of notes for each section and subdivided into the relevant issues within that section It contains elements of international comparative law citing authorities from many other common law and civil law jurisdictions Beyond the development of law since the last edition this sixth edition contains new practical features to aid the reader Each section now has a new contents table with each separate topic set out clearly and in a logical order which acts as reminder for the reader Further each separate topic now has a specific individual reference and the topics are grouped in a more systematic and logical way within each section to improve readability The book is primarily aimed at practitioners of arbitration both in the UK and abroad including solicitors barristers arbitrators and judges who are involved in the practice of arbitration whether domestic or international It is also aimed at UK and international students of international arbitration especially in relation to the sections with comparative legal analysis and comprehensive discussions on the interaction between the Arbitration Act 1996 and institutional arbitration rules Erratum The authors regret that the new version of the LCIA Rules will not now be published or be applicable until early 2020 due to unexpected circumstances It is understood that those Articles referred to in the text as the 2019 Rules will remain unchanged albeit that the Rules when in force should be and will be cited as the 2020 LCIA Rules The authors accept responsibility for and apologise for this error

**Private International Law in Nigeria** Chukwuma Okoli, Richard Oppong, 2020-06-11 This book examines the rules principles and doctrines in Nigerian law for resolving cases involving cross border issues It is the first book length treatise devoted to the full spectrum of private international law issues in Nigeria As a result of increased international business transactions trade and investment with Nigeria such cross border issues are more prevalent than ever The book provides an overview of the relevant body of Nigerian law with comparative perspectives from other legal systems Drawing on over five hundred Nigerian cases relevant statutes and academic commentaries this book examines jurisdiction in interstate and international disputes choice of law the enforcement of foreign judgments and international arbitral awards domestic remedies affecting foreign proceedings and international judicial assistance in the service of legal processes and taking of evidence Academics researchers and students as well as judges arbitrators practitioners and legislators alike will find Private International Law in Nigeria an instructive and practical guide

**Security Rights in Intellectual Property** Eva-Maria Kieninger, 2020-06-11 This book discusses the main legal and

economic challenges to the creation and enforcement of security rights in intellectual property and explores possible avenues of reform such as more specific rules for security in IP rights and better coordination between intellectual property law and secured transactions law In the context of business financing intellectual property rights are still only reluctantly used as collateral and on a small scale If they are used at all it is mostly done in the form of a floating charge or some other all asset security right The only sector in which security rights in intellectual property play a major role at least in some jurisdictions is the financing of movies On the other hand it is virtually undisputed that security rights in intellectual property could be economically valuable or even crucial for small and medium sized enterprises especially for start ups which are often very innovative and creative but have limited access to corporate financing and must rely on capital markets securitization capital market Therefore they need to secure bank loans yet lack their own traditional collateral such as land
