 Technological change is one of the most powerful forces transforming the American industrial relations In fact the synergistic
 relationships between technology and indus system trial relations are so complex that they are not well or completely
 understood We know that the impact of technology while not independent of social forces already has been profound it has
 transformed occupations creating new skills and destroying others altered the power relationships between workers and
 managers and changed the way workers learn and work Tech nology also has made it possible to decentralize some economic
 activities out of large metropolitan areas and into small towns rural areas and other coun tries Most important information
 technology makes it possible for interna tional corporations to operate on a global basis Indeed some international
