Loving to Survive Dee L.R. Graham, 1995-07-01 A selection of insights into the relationship between men and women Have you wondered Why women are more sympathetic than men toward O J Simpson Why women were no more supportive of the Equal Rights Amendment than men Why women are no more likely than men to support a female political candidate Why women are no more likely than men to embrace feminism a movement by about and for women Why some women stay with men who abuse them *Loving to Survive* addresses just these issues and poses a surprising answer Likening women's situation to that of hostages Dee L R Graham and her co authors argue that women bond with men and adopt men's perspective in an effort to escape the threat of men's violence against them Dee Graham's announcement in 1991 of her research on male female bonding was immediately followed by a national firestorm of media interest Her startling and provocative conclusion was covered in dozens of national newspapers and heatedly debated In *Loving to Survive* Graham provides us with a complete account of her remarkable insights into relationships between men and women In 1973 three women and one man were held hostage in one of the largest banks in Stockholm by two ex convicts These two men threatened their lives but also showed them kindness Over the course of the long ordeal the hostages came to identify with their captors developing an emotional bond with them They began to perceive the police their prospective liberators as their enemies and their captors as their friends as a source of security This seemingly bizarre reaction to captivity in which the hostages and captors mutually bond to one another has been documented in other cases as well and has become widely known as Stockholm Syndrome The authors of this book take this syndrome as their starting point to develop a new way of looking at male female relationships *Loving to Survive* considers men's violence against women as crucial to understanding

women s current psychology Men s violence creates ever present and therefore often unrecognized terror in women This terror is often experienced as a fear for any woman of rape by any man or as a fear of making any man angry They propose that women s current psychology is actually a psychology of women under conditions of captivitythat is under conditions of terror caused by male violence against women Therefore women s responses to men and to male violence resemble hostages responses to captors Loving to Survive explores women s bonding to men as it relates to men s violence against women It proposes that like hostages who work to placate their captors lest they kill them women work to please men and from this springs women s femininity Femininity describes a set of behaviors that please men because they communicate a woman s acceptance of her subordinate status Thus feminine behaviors are in essence survival strategies Like hostages who bond to their captors women bond to men in an effort to survive This is a book that will forever change the way we look at male female relationships and women s lives *Motor Record* ,1926 National Oceanographic Program -- 1965 United States. Newell,2023-08-29 Food Faiths Diet Religion and the Science of Spiritual Eating explores how individuals internalize scientific knowledge regarding health and diet and then incorporate that information into their lives as the basis of a personal spiritual practice In this book Catherine L Newell examines how science is used to justify a dietary lifestyle and investigates the world of spiritual eating which is comprised of practitioners who identify themselves not by a religion but by their diet These diets are based in diverse sciences such as anthropology ecology

systems biology nutritional studies biomedicine and physiology adherents view their diet as a lifestyle a path to enlightenment and a nebulously defined point of health This in turn enables the practitioner to locate themselves in relation to other members of their community to older traditions suffused with religious practice and to understand their praxis in relation to the entire biosphere While on one level this project explores how food health and diet can be a source of spiritual fulfillment on another level Food Faiths illustrates how science and religion are subsumed into a culture and merged to form the basis of an individual s lived spiritual practice     National Union Catalog ,1958 Includes entries for maps and atlases
