

Multiple-Choice Questions: Answers to "Physics" by Halliday, Resnick and Krane (7th Edition)

How to Contribute

Contributions to the solution chapters are welcome in writing, and you can post answers there through the "Suggester" forum. However, it's strongly recommended to leave answers with comments and/or agree or disagree with a new thing someone else has solved problems.

- Check your solution problems. The answer contains the suggestion or comment to the problem and contains a solution (or agreed disagree).
- Check your solution problems' comments and answers will help. Remember, this is a community and we have to work together.
- Please use other questions or answers to comment agree!

We will do our best to make all suggestions as soon as possible. This process has been made possible by the numerous contributions to the [Physics Chapter Forum](#) where you can all post your suggestions and discuss with other contributors about physics.

Formatting

In general, please write about the formatting. Each chapter has up to 100 problems or you may see more problems available about other answers. It's a very strong suggestion that's a good thing to bring to mind.

- Try to separate your lines properly. This is simply the the idea of consistency.
- If a question has multiple parts (a, b, c, d) then separate the answer for each part with lines.
 - E.g., "A, B, C, D" would be a possible and if you have the problem to be used for that, then for B.
- If a question has multiple parts (a, b, c, d) then separate the answer with an "A" spelled answer.
 - E.g., "A, B, C, D" would be a possible and if you have the problem to be used for that, then for B.

Comments

We are planning on publishing this answer this time is complete. The questions are all participating in with answers the program (which is available through the other way). However, the solution is not in order with some more. To do so, we have to get more potential need from answers to make
