The Bahamas International Monetary Fund. Western Hemisphere Dept.,2018-05-14 This Selected Issues paper makes the case for a rules based fiscal framework for The Bahamas and discusses its design calibration and implementation The IMF staff recommends adopting a headline deficit ceiling and a cap on current expenditure growth both calibrated to guide debt toward a suitable medium term anchor while allowing room for stabilization A headline deficit target is simpler to communicate and monitor than a structural balance rule Such a framework would allow expanding capital spending up to the limit provided by the deficit ceiling in the event of improvements in revenue performance Moreover in line with best practices the framework should be anchored around a pre defined medium term debt target that will guide the calibration of proposed operation rules

Insights in Coronavirus Disease (COVID-19) - Surveillance, Prevention and Treatment Marc Jean Struelens,Zisis Kozlakidis,2022-11-10

Disaster Risk Management Prof. Dr. Vladimir M. Cvetković,2024-04-22 The textbook is intended for students of basic and master academic studies as well as to a wider professional audience members of the emergency services etc who are increasingly faced with the need for a more thorough understanding of the problem of a multidisciplinary approach in the identification process disaster risk analysis and treatment The content of the textbook is in line with the curriculum of the subject Disaster Risk Management which is taught in the third year of basic academic studies of the Faculty of Security In the writing of the textbooks great attention was paid to meeting high standards in terms of scientific and professional and pedagogical and didactic requirements and extensive scientific and professional material of all relevant foreign and domestic authors was used Besides the author used a fair treasure trove of his scholarly and professional papers which have been scientifically verified by numerous international and national reviewers Also the author incorporated most of his research

findings in the country and abroad into the text of the textbook to enrich it with scientifically verified facts Also invaluable experience in working with students has helped to release the textbook from the additional scientific reflection that would make it difficult to acquire basic knowledge in the field of disaster risk management The first edition of the textbook also has its limitations which are reflected in the insufficient theoretical development of the scientific discipline which is relatively young and should contribute to creating additional conditions for the construction of the theory I would like to emphasize that the textbook represents the first such publication published in the Serbian language in our region which will greatly improve the knowledge and professional competencies of the general professional public
