Environment Science Behind The Stories 3rd Edition

Jay Withgott, Scott R. Brennan

Environment Science Behind The Stories 3rd Edition:

Essential Environment Scott R. Brennan, Jay Withgott, 2005 *Environment The Science Behind the Stories Brief Version* is an introductory textbook that uses case studies and real data to demonstrate the role of science in solving pressing environmental problems. Dynamic central case studies are integrated throughout each chapter capturing readers' attention and providing them with a contextual framework on which to build their understanding of concepts in environmental science. Science Behind the Story boxes explain how scientists know what they know about environmental problems while opposing viewpoints on contentious environmental issues allow readers to hear both sides of the story. With only 14 chapters the book avoids the encyclopedic approach of other textbooks on the market and instead offers only the essential concepts, theories, and principles of environmental science. In particular, the authors have condensed the material on environmental policy, agriculture, atmosphere, and water, providing the reader with the essential material they need in a more concise, affordable format. *An Introduction to Environmental Science*, *Environmental Economics and Policy*, *Chemistry*, *Energy*, and *Environmental Systems*, *Ecology and Evolution*, *Human Population Growth*, *Soils and Agriculture*, *Toxicology*, and *Environmental Health*, *Atmospheric Science*, *Air Pollution and Climate Change*, *Marine and Freshwater Resources*, *Biodiversity and Conservation*, *Biology*, *Land Use*, *Forest Management*, and *Creating Livable Cities*. *Nonrenewable Energy Sources and Their Environmental Impacts*, *Renewable Energy Sources*, *Waste Management*. Boersema, 2015-04-13 In this book Jan J Boersema reconstructs the ecological and cultural history of Easter Island and critiques the hitherto accepted theory of the collapse of its civilization The collapse theory advanced most recently by Jared Diamond and Clive Ponting is based on the documented overexploitation of natural resources particularly woodlands on which Easter Island culture depended Deforestation is said to have led to erosion followed by hunger conflict and economic and cultural collapse Drawing on scientific data and historical sources including the shipping journals of the Dutch merchant who was the first European to visit the island in 1722 Boersema shows that deforestation did not in fact jeopardize food production and lead to starvation and violence On the basis of historical and scientific evidence Boersema demonstrates how Easter Island society responded to cultural and environmental change as it evolved and managed to survive
