Poverty Alleviation and Environmental Law Yves Le Bouthillier, Miriam Alfie Cohen, Jose Juan Gonzalez Marquez, Albert Mumma, Susan Smith, 2012-01-01 The alleviation of poverty and the protection of the environment are both critical challenges for the vindication of basic human rights for all of humankind This relationship is however not necessarily an easy one While there is an inextricable link between poverty and the degradation of the environment a sophisticated analysis of a problem needs to deal with those cases where the need to increase economic opportunity for poor communities may appear to conflict with fragile ecosystems or the preservation of traditional practices This collection provides the most sustained engagement with these problems Drawing on the expertise of a range of distinguished authors this book presents the reader with an integrated global engagement with these problems In doing so it represents a landmark effort towards the creation of a coherent literature to deal with one of humankind s most pressing challenges Dennis Davis Judge of the High Court South Africa The complex uneven and challenging relationships between poverty alleviation and environmental regulation are impossible to trace in a single book but this collection brings a carefully selected set of policy relevant context responsive practical legal analyses to bear in a fresh examination of the present and future challenges involved This is a timely contribution in the search for regulatory responses that alleviate rather than exacerbate the myriad forms of adaptation apartheid now so painfully evident in the relationship between poverty injustice and environmental degradation Anna Grear University of Waikato New Zealand The subject of poverty cannot be ignored by environmentalists as the poor are the most affected by the diverse impacts of environmental degradation and climate change such as on water natural resources and cultural heritage sites In addition slum dwellings exacerbate the plight of the poor The book is a collection of diverse topics by renowned environmental legal experts which deal with the relationship between the alleviation of poverty and the protection of the environment Each writer addresses the challenges raised in various issues and recommends solutions which range from linking with human rights the need for public participation the role of environmental courts and other mechanisms Koh Kheng Lian National University of Singapore This timely book explores the complex relationship between the alleviation of poverty and the protection of the environment There is every reason to believe that these issues are in many ways interdependent However this book demonstrates that there are situations where alleviation of poverty and the protection of the environment appear to be in a fraught relationship The contributing authors illustrate that the role played

by law in this relationship whether at the international or national level will vary depending on the situation and will be more successful at pursuing environmental justice in some cases than in others This interdisciplinary study will appeal to academics and students in environmental law and other environmental disciplines environmental policymakers and NGOs interested in issues of poverty environment and indigenous peoples Air Quality Assessment and Management Dr Owen Harrop,2018-09-03 Air Quality Assessment and Management A Practical Guide describes the techniques available for an assessment while detailing the concepts and methodologies involved It reviews the principles of air quality management primary sources of air pollution impact of emissions on human health flora and fauna scoping of air quality impacts baseline monitoring impact prediction impact significance and pollution mitigation and control Emphasis will be placed on the practical side of AQA with numerous international case studies and exercises to aid the reader in their understanding of concepts and applications **Educating the Global Workforce for Public Health** Sanjay P. Zodpey,Roger A.

Harrison,Michal Grivna,John R. Finnegan,Connie J. Evashwick,2018-03-16 Good quality management of the health system demands a critical mass of health professionals with sound technical knowledge The education that produces a workforce of appropriate size and skills is often a challenge in the delivery of quality health services Incidentally health professionals education has not kept pace with the new emerging challenges Recent globalization of health has further led to international migration of health professionals thereby leading to cross border recognition of health workers with an appropriate skill mix knowledge and competence The Lancet Commission Report of 2010 highlighted the need to develop a common strategy at a global level for postgraduate medical nursing and public health education that reaches beyond the confines of national borders and the silos of individual professions This vision would require a series of instructional and institutional reforms which should be guided by two proposed outcomes transformative learning and interdependence in education The purpose of this Research Topic is to increase the shared understanding of the current status of the education of the health workforce around the globe particularly those working in the public health sector With this foundation further research and evaluation studies can then be done with a perspective that addresses global workforce issues impacting access prevention and care
