Calvin, 2010-08-09 Eco-Capitalism Robert Guttman, 2018-06-20 Our planet faces a systemic threat from climate change which the world community of nations is ill prepared to address and this book argues that a new form of ecologically conscious capitalism is needed in order to tackle this serious and rising threat While the Paris Climate Agreement of 2015 has finally implemented a global climate policy regime its modest means belie its ambitious goals Our institutional financial organizations are not equipped to deal with the problems that any credible commitment to a low carbon economy will have to confront We will have to go beyond cap and

trade schemes and limited carbon taxes to cut greenhouse gas emissions substantially in due time This book offers a way forward toward that goal with a conceptual framework that brings environmental preservation back into our macro economic growth and forecasting models This framework obliges firms to consider other goals beyond shareholder value maximization outlining the principal tenets of a climate friendly finance and introducing a new type of money linked to climate mitigation and adaptation efforts

Climate Injustice Friederike Otto, 2025-03-25 From one of the world's most celebrated thinkers on climate change comes a groundbreaking investigation into extreme weather I can't recommend this book highly enough It will change how you think about the most important story of our time JEFF GOODELL New York Times bestselling author of *The Heat Will Kill You First* Searing in her clarity Friederike Otto demonstrates irrefutably how the North's fossil fuel powered extractivist economic model drives global climate disruption at the expense of the living world *Climate Injustice* prosecutes the case all it needs now is a courtroom preferably in The Hague JOHN VAILLANT author of *Fire Weather A True Story from a Hotter World* Climate change does not affect everyone equally While many scientists focus on studying climate change as a physics problem Friederike Otto one of the world's most renowned climate scientists sees it as a symptom of the global crisis of inequality not its cause In this ambitious fast paced book she offers concrete examples of how extreme weather events caused by climate change reveal uncomfortable truths about the failures of political and social infrastructures around the world Comparing eight extreme weather events including heat waves in North America floods in Pakistan droughts in Madagascar and wildfires in Australia Otto reveals how climate change is affecting the world's most vulnerable whether they are women working on farms in Ghana during heat waves or elderly people who died during floods in Germany In particular Otto examines the Global North's extractionist view of the Global South a view that ensures elites are protected while others bear the brunt of the climate disaster *Climate Injustice* shares the stories of real people shining a light on the real damage inflicted on real lives Above all it shows how racism colonialism sexism and climate change are interconnected and how positive changes on one level can lead to positive effects on another Authored by the co founder of World Weather Attribution a cutting edge scientific method that pinpointed the role of climate change in extreme weather events for the first time *Climate Injustice* offers a groundbreaking view on the fires floods heatwaves and storms that are wreaking havoc at an alarming pace Inequality and injustice are at the core of what makes climate change a problem for humanity Fairness and global justice must therefore be at the core of the solution Climate justice concerns everyone

The Politics of Global Climate Change Patrick M. Regan, 2015-11-17 In 2009 the US House of Representatives passed legislation requiring reductions in greenhouse gas emissions by 18 percent over the coming decade Later that year President Obama went to Copenhagen to sign a treaty requiring reductions by 50 percent over a two decade period The President came back with nothing no firm commitment to reduce emissions and only a vague target to hold global temperature rises to under 2 C How does a President who has a 75 vote majority in the House and a 19 vote majority in the Senate who has pre approval for a

treaty reducing greenhouse gas production by 18 percent not achieve a treaty with at least the minimum goal of 18 percent reductions by 2020 Others have answered the puzzle by looking at institutional designs or negotiation dynamics This book articulates a multilevel process that starts with local politics to explain how they can influence international negotiations and why President Obama's efforts in Copenhagen were doomed to fail Understanding the role of local private interests can help form strategies for overcoming national resistance to climate change legislation and ultimately international agreements that could change the environmentally self destructive course we are on
