Bioethics in Canada, Third Edition Carol Collier, Rachel Haliburton, 2021-03-25 Now in its third edition, *Bioethics in Canada: A Philosophical Introduction* offers a comprehensive overview of the philosophical, historical, and medical concepts shaping contemporary debates on biomedical issues. The text opens with an introduction to moral theory and bioethical principles, followed by application of these theories and principles to real-world ethical conflicts involving abortion, distributive justice, genetics, reproductive technology, and other vital topics. A landmark case opens each chapter, illuminating the many issues involved in these debates as well as the philosophical assumptions that shape them. Thoroughly updated to reflect recent political, medical, and cultural changes, this third edition features new sections on Medical Assistance in Dying (MAiD), the moral philosophy of liberalism in bioethics, the Mad movement, CRISPR and gene editing, and expanded content on mental health, rural and remote communities, and codes of conduct and codes of ethics. Accessibly written with newly added case studies in the health care workplace, this text is an insightful resource for courses in the disciplines of philosophy, health studies, medicine, and nursing, providing a strong ethical foundation in an ever-changing field. [Animals and Ethics - Third Edition](#) Angus Taylor, 2009-05-27 Can animals be regarded as part of the moral community? To what extent, if at all, do they have moral rights? Are we wrong to eat them, hunt them, or use them for scientific research? Can animal liberation be squared with the environmental movement? Taylor traces the background of these debates from Aristotle to Darwin and sets out the views of numerous contemporary philosophers including Peter Singer, Tom Regan, Mary Anne Warren, J. Baird Callicott, and Martha Nussbaum, with ethical theories ranging from utilitarianism to eco-feminism. The new edition also includes

provocative quotations from some of the major writers in the field As the final chapter insists animal ethics is more than just an academic question it is intimately connected both to our understanding of what it means to be human and to pressing current issues such as food shortages environmental degradation and climate change
