Sport, Physical Culture, and the Moving Body
Joshua I. Newman, Holly Thorpe, David Andrews, 2020. *Sport Physical Culture and the Moving Body* explores the extent to which the body when moving about active body spaces: the gymnasium, the ball field, the lab, the running track, the beach, or the stadium, and those places less often connected to physical activity: the home, the street, the classroom, the automobile. It is bounded to technologies of life and living as well as to the political arrangements that seek to capitalize upon such frames of biological vitality. To do so, the authors problematize the rise of active body science, kinesiology, sport, and exercise sciences, performance, biotechnology, and the effects these scientific interventions have on embodied lived experience. *Sport Physical Culture and the Moving Body* offers a groundbreaking departure from representationalist tendencies and orthodoxies brought about by the cultural turn in sport and physical cultural studies.
