Study Guide & Review Worksheets

Adaptations

Terms to Know

- Physical Adaptation:** Special body parts that help an animal survive.
- Behavioral Adaptation:** An action or behavior that helps an animal survive.
- Population:** A group of organisms of the same kind that live in the same place.
- Fossil:** Preserved remains or impressions of a living organism.

Fossils

Fossils help scientists make inferences about past life and conditions in the areas where they discover fossils.

For example, a paleontologist discovers this fish fossil in the deserts of Arizona. The paleontologist can infer that the area once was covered in water and fish were part of the ecosystem. This means that the desert could have had a lake, pond, or other body of water many years ago.

Changes to Habitats

For populations to survive, they need to be able to **find food, defend themselves, and reproduce**.

If the environment changes, populations need to adapt or move to a new environment to survive.

For example, a herd of zebras live near a watering hole. The temperatures in the area are increasing and rainfall is decreasing. Soon, the watering hole dries up. The zebras need to find another water source nearby or move to a different habitat to survive.
