Food Education and Food Technology in School Curricula Marion Rutland, Angela Turner, 2020-04-08
 This book draws together the perceptions and experiences from a range of international professionals with specific reference to food education. It presents a variety of teaching learning and curriculum design approaches relating to food across primary secondary and vocational school education undergraduate initial teacher education programs and in service professional development support contexts. Contributions from authors of a variety of background and countries offer insight into some of the diverse issues in food education internationally lessons to be learned from successes and failures including action points for the future. The book will be both scholarly and useful to teachers in primary and secondary schools *Beyond A-levels* Ann Hodgson, Ken Spours, 2003-12-16 Since its introduction over 50 years ago the A level has been a constant subject of debate in schools HE and government. Sometimes hailed as a gold standard there is now intense speculation about the future of the A level in particular but also about post 14 qualifications in general. The furore about quality and standards which accompanies each year's A level results has become an annual fixture in the UK press calendar. With the introduction of Curriculum 2000 and an increasing number of calls for Baccalaureate style examinations vocational qualifications and more the need for serious debate and change in this field is clear. Based on primary research by two of the leading commentators on the qualifications this book is a wide ranging and critical view of the fundamental approaches of the education system in Britain today. With government action on this subject looking inevitable this will be a challenging and important book for anyone interested in this debate The Salisbury Review, 1986

Special Education and Globalisation Sheila Riddell, 2018-10-16 Special Education and Globalization illustrates the way in which inclusive education has become the dominant discourse across Europe and the wider international context. Contributions to this book highlight the tensions evident within each jurisdiction related to the construction of disability within specific historical and cultural antecedents. These tensions often involve the relationship between official policy discourses and grassroots practices based on the assumptions of classroom practitioners who may have strong views on individual deficits. Parents and voluntary organisations may also have an interest in asserting the specialness of specific conditions which require provision outside the mainstream. Finally the emergence of new bureaucratic structures in an era of heightened national and individual competition often run counter to the ethos of co operation which informs inclusive practice. This book was originally published as a special issue of *Discourse Studies in the Cultural Politics of Education* Teaching and Learning Foreign Languages Nicola McLelland, 2017-07-14 Teaching and Learning Foreign Languages provides a comprehensive history of language teaching and learning in the UK from its earliest beginnings to the year 2000. McLelland offers the first history of the social context of foreign language education in Britain as well as an overview of changing approaches methods and techniques in language teaching and learning. The important impact of classroom external factors on developments in language teaching and

learning is also taken into account particularly regarding the policies and public examination requirements of the 20th century Beginning with a chronological overview of language teaching and learning in Britain McLelland explores which languages were learned when why and by whom before examining the social history of language teaching and learning in greater detail addressing topics including the status that language learning and teaching have held in society McLelland also provides a history of how languages have been taught contrasting historical developments with current orthodoxies of language teaching Experiences outside school are discussed with reference to examples from adult education teach yourself courses and military language learning Providing an accessible authoritative history of language education in Britain Teaching and Learning Foreign Languages will appeal to academics and postgraduate students engaged in the history of education and language learning across the world The book will also be of interest to teacher educators trainee and practising teachers policymakers and curriculum developers
