

Guided Practice in the Classroom

What is Guided Practice?

Guided practice is an approach to educational instruction based on the sociocultural theory of learning and teaching. It involves the use of teacher guidance and facilitation that is gradually released as students develop competence with a task or skill.

The 'I do, We do, You do' method of Guided Practice

Steps	Pedagogical Strategies	Description
1. I Do	Teacher Modelling	Teacher models the task by breaking it down into clear, understandable steps. Students observe, take notes and ask questions.
2. We Do	Co-Construction	Teacher and students complete task in groups. Students are encouraged to ask questions, predict the next steps, plan ahead and debate the best ways to complete the task.
3. You Do	Facilitation	Students attempt to do the task alone or in pairs with the guidance of the teacher. Teacher provides prompts, open-ended questions, nudges and visual aids as a form of scaffolding.
4. You Do	Independent Practice	Students do the task independently without teacher facilitation in various different contexts to demonstrate competency.

Newton, 2018-12-14 College students finishing their academic preparation programs face the difficult challenge of transitioning into the teaching profession In a short period of time they can no longer function as a student themselves and must immediately transform into a professional educator This can be a difficult challenge for a young person and they need guidance doing this successfully The one opportunity college students have in gaining practical experience as a teacher is through the student teaching experience Unfortunately many students squander this critical opportunity and finish their assignment without maximizing their own learning and without capitalizing on professional opportunities that they will need

to be hired as a teacher By building a professional brand name through a thoughtful preservice teaching experience novice educators are better able to survive the application and interview process and secure a teaching position Capitalizing on the difficult transition point between the college experience and the school environment is more important than ever When this is done in a systematic and thoughtful manner educators can be certain that they are as prepared as possible to enter the demanding profession of education
