**The Failure of China's Democratic Reforms** Zaijun Yuan, 2011-12-08 In its propaganda the Chinese Communist Party does not deny the value of democracy but it insists that democracy in China can be only socialist democracy with Chinese characteristics The most essential nature of such democracy is that it is under the single party system and it excludes multi party politics and competitive elections In recent years Chinese democracy has won more support because of achievements the party has made in developing economy This raises a question does this efficient authoritarian political system in China even if it is not democratic deserve applause because it can facilitate economic development The party also insists that it is democratic But is the party s theory of democracy compatible with western democracy Since 1998 the party has organized some political reforms such as direct elections for township executives direct elections for township party secretaries township party congress reform and deliberative democracy experiments while maintaining single party politics In the party s propaganda some of these reforms have become party achievements in improving socialist democracy with Chinese characteristics In addition to these four kinds of party organized reforms another reform originated from the grassroots the participation of independent candidates in a few local people s congress elections This book examines these five local political reforms It demonstrates that the four reforms instigated and organized by the party were tightly controlled and manipulated by the party Although some reform measures may possibly liberalize parts of China s political mechanism it is highly unlikely that the four reforms will eventually lead to political democratization in China In the fifth reform which was motivated from outside the bureaucratic system the party took drastic measures to repress the political participation of grassroots power As a result nearly all independent candidates in the local people s congress elections failed in their

attempts to gain office The prospects for this reform are also poor The book argues that all five reforms have failed and that none will lead to China's democratization in the near future The book concludes that the party's authoritarian regime in China is by nature anti-democratic and that so-called socialist democracy with Chinese characteristics is not democratic

**The Crisis of Democratic Pluralism** Brendan Sweetman, 2021-09-14 This book argues that contemporary liberal democracy is reaching a crisis Brendan Sweetman contends that this crisis arises from a contentious pluralism involving the rise of incommensurable worldviews that emerge out of the absolutizing of freedom over time in a democratic setting This clash of worldviews is further complicated by a loss of confidence in reason and by the practical failure of public discourse A contributory factor is the growing worldview of secularism which needs to be distinguished from both the process of secularization and the concept of the secular state After describing the crisis and exploring these themes and also rejecting proposed solutions from recent liberal political theory Sweetman develops an approach to pluralist disagreement which requires a re-envisioning of the relationship between religion secularism and politics and which allows a limited place for all worldviews in the state including religious worldviews Engaging with the work of Philip Kitcher Robert Audi John Rawls A C Grayling Martin Luther King Cile Laborde John Stuart Mill John Locke and Plato Sweetman's approach is a formidable innovation in the quest to maintain a free and fair society

**Order** Robert Reiner, 2013-04-22 Law and order has become a key issue throughout the world Crime stories saturate the mass media and politicians shrilly compete with each other in a race to be the toughest on crime Prisons are crammed to bursting point and police powers and resources extended repeatedly After decades of explosive increase in crime rates these have plummeted throughout the Western world in the 1990s Yet fear of crime and violence and the security industries catering for these anxieties grow relentlessly This book offers an up to date analysis of these contemporary trends by providing all honest and concerned citizens with a concise yet comprehensive survey of the sources of current problems and anxieties about crime It shows that the dominant tough law and order approach to crime is based on fallacies about its nature sources and what works in terms of crime control Instead it argues that the growth of crime has deep seated causes so that policing and penal policy at best can only temporarily hold a lid down on offending The book is intended to inform public debate about these vital issues through a critical deconstruction of prevailing orthodoxy With its focus on current policies problems and debates this book is also an excellent introduction to criminology for the growing numbers of students of the subject at all levels     **The Plebs** ,1929
