## Muscle Contraction WebQuest

### Introduction

**Welcome:** Skeletal Muscle Contraction-Spinach Connection

**Description:** Learn the anatomy and physiology of a muscle contraction using animations. Project-based assessment concludes the WebQuest.

**Grade Level:** 9-12

**Curriculum:** Anatomy

**Task 1:** Review of muscle contraction concepts.

Watch the following animations in order and then answer the questions that follow.

### Neuromuscular Junction

1. What causes voltage-gated calcium ion channels to open?
2. Calcium moving into the neuron causes vesicles to release a neurotransmitter. What's the name of this neurotransmitter?
3. What is the name of the enzyme that breaks down Ach?

### Action Potentials and Muscle Contractions

4. Explain what you think a neuromuscular junction is.
5. What is the name of the protein that covers up the myosin binding sites on actin?
6. Create an analogy that describes the role of troponin & tropomyosin.
7. How would you describe a cross-bridge?

### Breakdown of ATP and Cross-Bridge Movement during Muscle Contraction

### Muscular System, Sliding Filament Theory 1

8. What is the connective tissue that connects muscle to bone called?
9. What is the connective tissue that separates **bundles** of muscle fibers?
10. What is the connective tissue that separates **individual** muscle fibers?

*Mosby's Pathology for Massage Professionals - E-Book* Susan G. Salvo, 2021-09-05 Get complete massage pathology information in one convenient text *Mosby's Pathology for Massage Professionals* 5th Edition provides concise pathology information along with specific therapeutic recommendations Coverage of more than 300 pathologies shows you how to appropriately tailor treatment and more than 500 full color photographs make it easier to recognize common pathologies Written by massage therapy educator researcher and practitioner Dr Susan Salvo this resource provides the pathology knowledge you need to succeed in the classroom and in your career Coverage of more than 300 pathologies provides students with ample information without being overwhelming More than 500 full color photographs help students recognize common diseases and conditions Case studies in each chapter encourage students to apply their knowledge and develop clinical reasoning skills UNIQUE Hospital Based Massage chapter covers different protocols needed for massage therapists working in institutionalized care settings and provides useful information about working with clients who are medically fragile or in hospice care User friendly comprehensive format makes it easy to find key information with learning objectives a systems overview that includes the aging process and pathologies that feature descriptions etiologies signs and symptoms current treatment measures including medications in bold italics for easy identification and massage modifications UPDATED Refreshed artwork throughout the book visually reinforces key concepts and techniques UPDATED Information on the biopsychosocial model transmission based precautions and disinfection procedures for today's massage practice UPDATED Inclusion of sleep disorders opioids and CBD use by clients and their massage considerations UPDATED Addition of evidence based protocols for scar tissue constipation hypoglycemia and more UPDATED Detailed information on how to work with clients after surgery who have a colostomy amputations or who are on dialysis UPDATED Thoroughly reviewed and revised pathologies feature current research findings and reflect what students will encounter in today's massage therapy practice with a focus on evidence informed practice

*Muscle Contraction* Clive R. Bagshaw, 1982-10-21 The student of biological science in his final years as an undergraduate and his first years as a graduate is expected to gain some familiarity with current research at the frontiers of his discipline New research work is published in a perplexing diversity of publications and is inevitably concerned with the minutiae of the subject The sheer number of research journals and papers also causes confusion and difficulties of assimilation Review articles usually presuppose a background knowledge of the field and are inevitably rather restricted in scope There is thus a need for short but authoritative introductions to those areas of modern biological research which are either not dealt with in standard introductory textbooks or are not dealt with in sufficient detail to enable the student to go on from them to read scholarly reviews with profit This series of books is designed to satisfy this need The authors have been asked to produce a brief outline of their subject assuming that their readers will have read and remembered much of a standard introductory textbook of biology This outline then sets out to provide by building on this

basis the conceptual framework within which modern research work is progressing and aims to give the reader an indication of the problems both conceptual and practical which must be overcome if progress is to be maintained     Regulation of Smooth Muscle Contraction Robert S. Moreland, 2012-12-06 Sixth Annual Graduate Hospital Research Symposium

REGULATION OF SMOOTH MUSCLE PROGRESS IN SOLVING THE PUZZLE Every so often a scientific conference comes at a time when everyone has new and exciting information when old dogmas do not seem to be as well established and when speakers and participants alike are ready to challenge interpretations of old and new experimental data This was such a conference What turns on a smooth muscle cell The precise answer to this question has eluded scientists for much longer than I have been involved in the field We know that an increase in cytosolic calcium is necessary and we know that phosphorylation of the 20 kDa myosin light chain is an important step in the process We do not know if other processes are necessary for the initiation and for maintenance of a smooth muscle contraction nor do we know if other processes modulate the regulation of contraction The goal of the symposium on which this volume is based was to explore the most current hypotheses for the answers to these questions I believe that after reading the chapters included in this volume you will agree that this goal was achieved The importance of calcium and calmodulin dependent myosin light chain phosphorylation in the regulation of smooth muscle contraction was reinforced by many presentations However the status of myosin light chain phosphorylation as a simple calcium dependent switch came under serious suspicion     Muscle Contraction ,1980
