Hanrahan,2009 This title showcases modern environmental modelling methods the basic theory behind them and their incorporation into complex environmental investigations Confucianism, Democratization, and Human Rights in Taiwan

Joel Fetzer,J. Christopher Soper,2013 Responding to the Asian values debate over the compatibility of Confucianism and liberal democracy Confucianism Democratization and Human Rights in Taiwan by Joel S Fetzer and J Christopher Soper offers a rigorous systematic investigation of the contributions of Confucian thought to democratization and the protection of women indigenous peoples and press freedom in Taiwan Relying upon a unique combination of empirical analysis of public opinion surveys legislative debates public school textbooks and interviews with leading Taiwanese political actors this essential study documents the changing role of Confucianism in Taiwan s recent political history While the ideology largely bolstered authoritarian rule in the past and played little role in Taiwan s democratization the belief system is now in the process of transforming itself in a pro democratic direction In contrast to those who argue that Confucianism is inherently authoritarian the authors contend that Confucianism is capable of multiple interpretations including ones that legitimate democratic forms of government At both the mass and the elite levels Confucianism remains a powerful ideology in Taiwan despite or even because of the island s democratization Borrowing from Max Weber s sociology of religion the writers provide a distinctive theoretical argument for how an ideology like Confucianism can simultaneously accommodate itself to modernity and remain faithful to its core teachings as it decouples itself from the state In doing so Fetzer and Soper argue Confucianism is behaving much like Catholicism which moved from a position of ambivalence or even opposition to democracy to one of full support The results of this study have profound implications for other Asian countries such as China and Singapore which are also Confucian but have not yet made a full transition to democracy Cases on Instructional Technology in Gifted and Talented Education Lennex, Lesia,Nettleton, Kimberly Fletcher,2014-09-30 As new classroom resources are developed educators strive to incorporate digital media advancements into their curriculum to provide an enriched learning experience for students with exceptional intelligence as well as students in need of supplementary instruction Though the resources exist their effective use in the classroom is currently lacking Cases on Instructional Technology in Gifted and Talented Education provides educators with real life examples and research based directions for the use of digital media resources in classrooms at all academic levels This reference work will appeal to educators and researchers interested in enriching P 12 classrooms in order to extend student learning and promote effective e learning in the classroom *Focus on Earth Science* ,2001 Review of the New York City Department of Environmental Protection Operations Support Tool for Water Supply National Academies of Sciences, Engineering, and Medicine,Division on Earth and Life Studies,Water Science and Technology Board,Committee to Review the New York City Department of Environmental Protection Operations Support Tool for Water Supply,2019-01-11 New York City s water supply system is one of the oldest largest and most complex in the nation It delivers more than 1 1 billion gallons of water each day from three upstate

watersheds Croton Catskill and Delaware to meet the needs of more than eight million people in the City one million people in Westchester Putnam Orange and Ulster counties and millions of commuters and tourists who visit the City throughout the year The Catskill and Delaware portions which make up about 90 percent of the supply receive no filtration or treatment other than disinfection except for rare instances of high turbidity when a coagulant is added to increase deposition of suspended solids The remaining 10 percent of the supply comes from the Croton watershed and receives treatment via filtration The drinking water supply is managed by the Bureau of Water Supply within the New York City Department of Environmental Protection NYC DEP To continue to avoid filtration of the Catskill Delaware portion of the water supply in 2007 NYC DEP reexamined its control of turbidity in the Catskill portion of the water supply including both structural improvements to the system and operational changes The Operations Support Tool OST was developed as part of these efforts OST couples models of reservoir operations and water quality it uses real time data on streamflow snow pack water quality reservoir levels diversions and releases and it incorporates streamflow forecasts all in order to predict future reservoir levels water delivery to customers and water quality within the system These predictions inform the system operators who then make decisions based on the most current data and forecasts This report reviews the use of OST in current and future reservoir operations It considers potential ways in which the City can more effectively use OST makes recommendations for additional performance measures and reviews the potential effects of climate change on the City s water supply to help identify and enhance understanding of areas of potential future concern with regard to the use of OST

Planning with Complexity Judith E. Innes, David E. Booher, 2010-01-11 Analyzing emerging practices of collaboration in planning and public policy to overcome the challenges complexity fragmentation and uncertainty the authors present a new theory of collaborative rationality to help make sense of the new practices They enquire in detail into how collaborative rationality works the theories that inform it and the potential and pitfalls for democracy in the twenty first century

Representing the authors collective experience based upon over thirty years of research and practice this is insightful reading for students educators scholars and reflective practitioners in the fields of urban planning public policy political science and public administration
