All businesses have confusing terms and acronyms such as DRI (Directly Responsible Individual), B2B (Business to Business) and ROI (Return On Investment). Just like other industries, education has its own set of terminology and acronyms that are confusing to non-educators. Combine that with the constant development of new math programs with their own lingo and you have a recipe for complete parental confusion. The goals of this guide: 1. Explain the confusing terminology. 2. Give you insights about what teachers and the math programs are trying to do. 3. Help you to help your child survive and thrive in math.
