government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8. Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end of course tests as well as alternative measures such as portfolios, exhibitions and student learning objectives. In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment. Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field. Condition or Process? Researching Race in Education Adrienne D. Dixon, Gloria J. Ladson-Billings, Cecilia E.

Suarez, William T. Trent, James D. Anderson, 2021-01-18 The question of why we need to think about how we research race demands a conceptualization of race that captures both its social construction and its temporal evolution. We need both an understanding of race and clarity about how we talk about it in our design and conduct of research and in how we interpret and apply it in our findings. As a field we can use research on race and racism in education to help construct social change. Our purpose with this volume is to underscore the persistence of the discriminatory actions, processes and the normalization of the use of race and class conditions to justify the existing and growing disparity between the quality of life and opportunity for middle class and more affluent Whites and that for people of color and people of color who live in poverty. As editors of this volume we wonder what more we could learn and understand about the process and condition of race if we dare to ask bold questions about race and racism and commit to methods and analyses that respect the experiences and knowledges of our research participants and partners.

Setting Performance Standards Gregory J. Cizek, 2012-03-22 Setting standards of performance is a ubiquitous task in education licensure certification and credentialling. It is found in elementary schooling, the professions, commercial applications and governmental and private organizations. It is one of the most complex, controversial and vexing issues facing specialists and policy makers today. This second edition solidifies Setting Performance Standards as the only book providing a comprehensive profile of both the issues and the how to methods that define this thorny field. Four chapters have been removed, 11 chapters have been added, 2 chapters have major revisions and all chapters have been updated. Comprehensive Part I provides a conceptual overview of standard setting and its overarching issues. Part II provides practical how to information on the newest standard setting methods. Part III provides information and advice on persistent and potential challenges in standard setting. Practical Part II is the heart of the book, reviews 16 of the newest standard setting methods far more than any other book. Expertise: Most of the well known authors from the 1st edition return with authors of equal stature contributing new chapters.

Old English Roger Lass, 1994-02-25 Old English is a companion to Old English studies and to historical studies of early English in general. It is also an introduction to Indo-European studies in the particular sense in which they underpin the history of English. Professor Roger Lass makes accessible in a linguistically up to date and readable form the Indo-European and Germanic background to Old English as well as what can be reconstructed about the resulting state of Old English itself. His book is a bridge between the more elementary Old English grammars and the major philological grammars and recent interpretations of the Old English data. Old English assumes a basic knowledge of phonetics and phonology, the elements of syntactic and morphological theory and an introduction to historical linguistics. An extensive glossary gives definitions of the major technical terms used.
