Guided Study Hall

Guided Study Hall:

Student Resistance to Schooling Kelly Ann Welsh, 2012 *Improving Homework Completion of Students Through Tutored Study Hall* Kori S. Dicken, Carol D. Foreman, Robin L. Jensen, Justin A. Sherwood, 2008 The purpose of this study was to examine the effects of a guided study hall on homework completion. Two groups of students were analyzed in their homework completion rates. Homework completion rates of the students that participated in Site A were reviewed in their five core subjects while the homework completion rates of the students at Site B were only reviewed in their math classes. Site A had 45 students participate in the study. Site B had two students in the study both from the same math teacher. Results indicate at both sites that a guided study hall helped reduce the rate of homework completion. Overall the rate before the study was 8% of homework was not being completed. By the completion of the study hall 4% of homework was incomplete. Results show that with the guidance of a teacher and the presence of a study hall students are more inclined to get their homework completed and may therefore increase the students' understanding. Educators should consider study halls to be a beneficial time for students who frequently do not complete their homework and even more beneficial if the teacher assists the students with their homework.
