The Law of Contracts Theophilus Parsons, 1866 On the Path to Virtue Geert Roskam, 2005

This study is divided into two main parts The first one is about the specific Stoic doctrine on moral progress prokop Attention is first given to the subtle view developed by the early Stoics who categorically denied the existence of any mean between vice and virtue and yet succeeded in giving moral progress a logical and meaningful place within their ethical thinking Subsequently the position of later Stoics Panaetius Hecato Posidonius Seneca Musonius Rufus Epictetus and Marcus Aurelius is examined Most of them appear to adopt a basically orthodox view although each one of them lays his own accents and deals with Chrysippus tenets from his own personal perspective Occasionally the heterodox position of Aristo of Chios proves to have remained influential too The second part of the study deals with the polemical reception of the Stoic doctrine of moral progress in Middle Platonism The first author who is discussed is Philo of Alexandria Philo deals with the Stoic doctrine in a very ideosyncratical way He never explicitly attacked the Stoic view on moral progress although it is clear from various passages in his work that he favoured the Platonic Peripatetic position rather than the Stoic one Next Plutarch s position is examined through a detailed analysis of his treatise *De profectibus in virtute* Finally attention is given to two school handbooks dating from the period of Middle Platonism Alcinous and Apuleius In both of them the Stoic doctrine is rejected without many arguments which shows that a correct and anti Stoic conception of moral progress was regarded in Platonic circles as a basic knowledge for beginning students The whole discussion is placed into a broader philosophical historical perspective by the introduction on the philosophical tradition before the Stoa and the epilogue about later discussions in Neo Platonism and early Christianity
