An underlying theme is the possibility of organizing a curriculum upon the basis of the activities of life in which children engage as opposed to subjects in which few are engaged. This book is an intermediate step from the wasteful, unsatisfactory organization currently in place toward a more desirable method. It presents a pragmatic pedagogy with definite aims, direct methods and appreciable results. The relationships of purpose, content and method place a high premium upon effort and immediate individual and cooperative activity under the guidance of social ideals. *Animal Friends to Sew* Sanae Ishida, 2020-05-05 a slew of child-friendly projects as adorable as they are functional. mobile population that has broken through the constraints of the government's household registration system. The author explores this important social change through a detailed ethnographic account of the construction, destruction, and eventual reconstruction of the largest migrant community in Beijing. She focuses on the informal privatization of space and power in this community through analyzing the ways migrant leaders build their power base by controlling housing and market spaces and mobilizing social networks. The author argues that to gain a deeper understanding of recent Chinese social and political transformations, one must examine not only to what extent state power still dominates everyday social life but also how the aims and methods of late socialist governance change under new social and economic conditions. In revealing the complexities and uncertainties of the shifting power and social relations in post-Mao China, this book challenges the common notion that sees recent changes as an inevitable move toward liberal capitalism and democracy. *The Paper Shade Book* Maryellen Driscoll, 2001. Teaching and Learning for Adult Skill Acquisition Elaine M. Silva Mangiante, Kathy Peno, 2021-05-01. The book *Teaching and Learning for Adult Skill Acquisition: Applying the Dreyfus and Dreyfus Model in Different Fields* will fill a unique niche in the field of adult higher and workforce education. It offers a current volume for scholars and practitioners based on both empirical studies and practice-based research on adult skill acquisition and development. Dreyfus and Dreyfus (1980, 1988, 2004, 2008) developed the novice-to-expert model of skill acquisition that illustrates growth over the course of a person's career in a particular domain. The skill model highlights a learner's movement across six levels of skill development: novice, advanced beginner, competent, proficient, expert, and mastery. This book will present examples of the application of the Dreyfus and Dreyfus model in different fields, i.e., health care, education, law, enforcement, business, serious gaming, military ethics training, etc., providing insight into how practitioners can develop their skills in their particular domains and how educators can promote this development. This collection will be appropriate for a wide variety of professors, researchers, practitioners, and students in the field of adult higher and workforce education. *The Teaching of Home Economics* Clara Maude Brown, Clara Brown Arny, Alice H. Haley, 1928.
