

IB ECONOMICS PAPER 1 ESSAY ADVICE

10 MARK QUESTION (Part a)

Step 1: Definition: Define a key word in the question

Step 2: Definition: Define another key word in the question (if there is another one)

Step 3: Definition: Define another key word in the question (if there is another one)

Step 4: Real life example: Briefly explain a real life example.

Step 5: Draw the diagram: Draw it accurately and fully labelled and with a title on top (clearly stating what it is showing, if appropriate the market, and where). Where possible, apply your example: e.g. Quantity of Oil (barrels), Price of Oil (\$).

Step 6 (i) Tell us what the diagram shows, in general. **Explain** a specific insight of **the diagram** (i.e. "As the diagram shows, the warmer weather results in a greater demand for ice cream. At Price P1, the quantity demanded increases from Q1 to Q2.")

Step 6 (ii) Tell using specific reference points on the diagram, subsequent effects, changes or knock-on effects (i.e. The rightward shift of the demand curve from D1 to D2, puts upward pressure on the price P1. This acts as a signal to producers that they can raise their price due to excess demand leading to a new price of P2).

The diagram must be **dynamic** (e.g. something has shifted, increased, decreased), use arrows for emphasis.

DO NOT ABBREVIATE ANY TERMS IN YOUR WRITTEN WORK UNTIL YOU HAVE WRITTEN THEM OUT IN FULL AT LEAST ONCE! Assume no prior knowledge of the person reading (i.e. that means they don't know what AS, PeD or GDP stand for).

15 MARK QUESTION (Part b)

Step 1: Carry out all the above steps as you would for a 10 mark question.

Do not repeat diagrams. If the diagram you need is in part (a) then refer to the diagram and the points on it in part (a).

Essays To Study For Economics Paper 1 2014

Alex Nicholls, Rafael Ziegler

Essays To Study For Economics Paper 1 2014:

The Upside of Inequality Edward Conard, 2016-09-13 The scourge of America's economy isn't the success of the 1 percent quite the opposite. The real problem is the government's well meaning but misguided attempt to reduce the payoffs for success. Four years ago Edward Conard wrote a controversial bestseller *Unintended Consequences* which set the record straight on the financial crisis of 2008 and explained why U.S. growth was accelerating relative to other high wage economies. He warned that loose monetary policy would produce neither growth nor inflation that expansionary fiscal policy would have no lasting benefit on growth in the aftermath of the crisis and that ill advised attempts to rein in banking based on misplaced blame would slow an already weak recovery. Unfortunately he was right. Now he's back with another provocative argument that our current obsession with income inequality is misguided and will only slow growth further. Using fact based logic Conard tracks the implications of an economy now constrained by both its capacity for risk taking and by a shortage of properly trained talent rather than by labor or capital as was the case historically. He uses this fresh perspective to challenge the conclusions of liberal economists like Larry Summers and Joseph Stiglitz and the myths of crony capitalism more broadly. Instead he argues that the growing wealth of most successful Americans is not to blame for the stagnating incomes of the middle and working classes. If anything the success of the 1 percent has put upward pressure on employment and wages. Conard argues that high payoffs for success motivate talent to get the training and take the risks that gradually loosen the constraints to growth. Well meaning attempts to decrease inequality through redistribution dull these incentives gradually hurting not just the 1 percent but everyone else as well. Conard outlines a plan for growing middle and working class wages in an economy with a near infinite supply of labor that is shifting from capital intensive manufacturing to knowledge intensive innovation driven fields. He urges us to stop blaming the success of the 1 percent for slow wage growth and embrace the upside of inequality: faster growth and greater prosperity for everyone.

Creating Economic Space for Social

Innovation Alex Nicholls, Rafael Ziegler, 2019-12-12 This book draws upon economic and sociological theory to provide a comprehensive discussion of economic space for social innovation addressing especially marginalized groups and the long term projects programmes and policies that have emerged and evolved within and across European states. It approaches the explanatory and normative questions raised by this topic via a novel approach: the Extended Social Grid Model (ESGM). Taking inspiration from the fields of economic sociology and ethics this model shows that social innovation processes must be structural and require change in power relations if marginalization is to be effectively dealt with via social innovation. Part I of the book sets out the ESGM including an exposition on the model along with background chapters on innovation power and marginalization ethics and social innovation and empirical methods. Part II explores the model with a focus on social innovation trajectories of social housing drinking water provision employment education and food provision. It also explores the operationalization of the model with a view to agency and empowerment as well as social innovation policy in Europe and

the use of social impact bonds as a tool for financing social innovation Part III revisits the ESGM and considers the explanatory adequacy and fruitfulness of the model for innovation research and for theorizing social innovation addressing questions on the role and limitations of participation in social innovation for the marginalized the role of capital for creating economic space for capabilities and how we can approach the social impact of social innovation This collection of essays presents a diverse range of perspectives on understanding and addressing the key issue of marginalization and offers key recommendations for policy makers engaging with social innovation across the European Union and beyond

Torres-González, 2024-08-02 The book examines how the outgrowth of the financial industry has contributed to the recent tendencies towards inequality and stagnation It proposes a monetary interpretation of these events using a Classical Keynesian theoretical approach derived from the work of Keynes and Sraffa The approach moves from the distributive conflicts among economic and social groups presuming that they influence the legislation shaping the organisation of the markets and the policy of the authorities It argues that the degrees of liquidity of assets which reflect the individual perceptions of their future prices ultimately depend on the organisation of the markets and policy decisions The development of his work persuaded Keynes that it was necessary to revolutionise the scientific foundations of economic discipline to effectively interpret events and recommend policies He consequently introduced in 1932 a monetary theory of production Following these lines Sraffa proposed in *Production of Commodities* to take the rate of interest as an independent variable in the theory of distribution Using the Classical Keynesian approach the book shows how the changes in legislation and policies since the abandonment of the Bretton Woods agreements have caused the outgrowth of finance and how these alterations have raised financial instability It identifies various competitive mechanisms through which financial events can affect income distribution and growth describing how they have triggered the recent tendencies towards inequality and stagnation This book is essential reading for researchers studying the interactions among financial markets distribution and growth

Words, Objects and Events in Economics Peter Róna, László Zsolnai, Agnieszka Wincewicz-Price, 2020-09-03 This open access book examines from a variety of perspectives the disappearance of moral content and ethical judgment from the models employed in the formulation of modern economic theory and some of the papers contain important proposals about how moral judgment could be reintroduced in economic theory The chapters collected in this volume result from the favorable reception of the first volume of the *Virtues in Economics* series and represent further contributions to the themes set out in that volume i examining the philosophical and methodological fallacies of this turn in modern economic theory that the removal of the moral motivation of economic agents from modern economic theory has entailed and ii proposing a return descriptive economics as the means with which the moral content of economic life could be restored in economic theory This book is of interest to researchers and students of the methodology of economics ethics philosophers concerned with agency and economists who build economic models that rest in the intention of the agent **The European Monetary Union**

After the Crisis Nazaré da Costa Cabral, 2020-06-09 This book provides a much needed detailed analysis of the evolution of

Europe over the last decade as well as a discussion about the path of reform that has been trodden in the aftermath of the financial crisis. It offers a multidisciplinary view of the E M U and captures the main factors that induced the reform of the monetary union, a process that has not been linear and is far from being concluded. The author examines the policy responses designed throughout the development of the crisis and assesses the scale of the crisis in Europe in comparison to other parts of the world as well as its prolonged effects both in economic and financial terms. An update on the current state of the art in the conception of risk sharing mechanisms is provided. With its innovative approach, the book analyses the financing issues which need to be taken into consideration in the design of these instruments and highlights the main categories of governmental risk sharing mechanisms, in particular the ones to be used as fiscal capacity. This is a timely and topical book and will be of interest to a broad audience including experts, scholars and students of European affairs, particularly those with economic, financial, legal and political science backgrounds.
