1. Find $m\angle PSQ$ if $m\angle PSQ = 3y - 5$ and $m\angle PRQ = 2y + 15$.

$$3y - 5 = 2y + 15$$

$$y = 20$$

$$3(20) - 5 = 55$$

[A] 55

[B] $\frac{55}{2}$

[C] 35

[D] 20

2. If $m\angle RST = 52$, what is $m\widehat{RST}$?

[A] 104

[B] 256

[C] 308

[D] 128

$$360 - 104 = 256^\circ$$

portrayal of the creation of the physical universe We examine all the details of forming a neutron the atoms the earth and the galaxies as related to the Torah Unlike most creational science books that biologically attack evolution or focus in on the flood or the big bang theory we build the entire universe from scratch namely nothing After building the microcosm we build the macrocosm and the earth We only touch biology from the standpoint of transition from before and after the fall After structuring the initial universe and earth we examine all the cataclysmic activity that formulates the world as we know it today Truly the reverence for Elohim is the beginning of knowledge and the Torah a light to follow for understanding The

reverence for Elohim is like deciding to look at the map for directions The Torah is like the images on the map The Ruach HaKodesh Holy Spirit gives us the ability to understand the images that we see on the map Have you ever wondered how plants survive after Elohim created them before there was a sun to divide day from night Or did you just decide that the whole idea is impossible *Spink & Son's Monthly Numismatic Circular* ,1904 [Dictionary of Architecture and Building Construction](#) Nikolas Davies,Erkki Jokiniemi,2008-06-19 With more than 20 000 words and terms individually defined the Dictionary offers huge coverage for anyone studying or working in architecture construction or any of the built environment fields The innovative and detailed cross referencing system allows readers to track down elusive definitions from general subject headings Starting from only the vaguest idea of the word required a reader can quickly track down precisely the term they are looking for The book is illustrated with stunning drawings that provide a visual as well as a textual definition of both key concepts and subtle differences in meaning Davies and Jokiniemi s work sets a new standard for reference books for all those interested in the buildings that surround us To browse the book and to see how this title is an invaluable resource for both students and professionals alike visit www.architectsdictionary.com
