User-Innovation Viktor Braun, Cornelius Herstatt, 2009-06-06 Economic growth is highly dependent on technological progress and innovation yet the sources from which these innovations originate are still largely misunderstood and untapped Recent research has demonstrated that users rather than manufacturers are often a critical source of innovation in numerous fields from extreme sports to medical devices to software This book systematically identifies the most important barriers to user innovation and critically evaluates the democratization of innovation argument by critically assessing the main legal economic technological and societal barriers to user innovation for the first time and proposing alternative possibilities Through original research the author reveals the dynamics of user innovation and offers strategies for minimizing those factors that inhibit and stifle the spread of this phenomenon From this analysis it becomes clear that user innovation has become more difficult over time and that the problem is now of how manufacturers can enable users to overcome the discussed barriers and simultaneously benefit from such consumer driven activities Arguing that licenses are not just an important technology commercialization instrument but are tools critical to generating innovations the author explains how licenses can in certain situations be employed to help users overcome some of the barriers to user innovation *User Innovation Barriers to Democratization and IP Licensing* is a practical guidebook as well as a startlingly original work of scholarship that will be essential reading for years to come *Electronics Now*, 1992-07 Logistics and Power Susan Zieger, 2025-09-09 From supply chains to surveillance how logistics drives modern power and its consequences Movement is the lifeblood of capital even more so than growth If goods people and information don't flow then profits don't either Ensuring that laborers shipping containers media commercially valuable data and much else are in the right place at the right time demands a subtle choreography Enter logistics Susan Zieger argues that logistics is the foundation of power in our time Blending detailed historical research with real life stories that crystallize the human and ecological consequences of supply chains *Logistics and Power* shows how the pursuit of efficient movement has come to organize economies while disordering societies and selves Logistics emerges as the key to consumerism and the experience of work It justifies corporate and police surveillance illuminates patterns of migration and exploitation and explains why the oceans are clogged with plastic It is in the sphere of logistics that capitalist motives are most dramatically in tension with planetary needs A headfirst encounter with the obscure forces subordinating all goals below those of capital *Logistics and Power* points the way to an alternative a mindful and politically attentive kind of movement compatible with human thriving **Johnson's Universal Cyclopaedia**, 1894 **The Universal Cyclopaedia**, 1900 **Popular Science**, 1992 **FCC Record** United States.
