Geomorphological Fieldwork addresses a topic that always remains popular within the geosciences and environmental science. More specifically, the volume conveys a growing legacy of field based learning for young geomorphologists that can be used as a student book for field based university courses and postgraduate research requiring fieldwork or field schools. The editors have much experience of field based learning within geomorphology and extend this to physical geography. The topics covered are relevant to basic geomorphology as well as applied approaches in environmental and cultural geomorphology. The book integrates a physical human approach to geography but focuses on physical geography and geomorphology from an integrated field based geoscience perspective. Addresses fluvial and karst landscapes in depth. Focuses on field based learning as well as educational geomorphology. Conveys experiential knowledge in international contexts. *Field Geology Education* Steven J. Whitmeyer, David W. Mogk, Eric J. Pyle, 2009-01-01. Field instruction has traditionally been at the core of the geoscience curriculum. The field experience has been integral to the professional development of future geoscientists and is particularly important as it applies to student understanding of spatial temporal and complex relations in the Earth system. As important as field experiences have been to geosciences education and the training of geoscientists, the current situation calls for discipline wide reflection of the role of field experiences in the geoscience curriculum in light of practical and logistical challenges, evolution in employment opportunities for geoscientists and changing emphases in the geoscience curriculum. This volume seeks to broaden participation in field instruction by showcasing diverse approaches to teaching in the field across the many geo disciplines encompassed by GSA books google.
