Women in Medicine in the Long Nineteenth Century Claire Brock,2024-07-31 As an exciting challenging and for some repulsive novelty and phenomenon the medical woman was fictionalised swiftly in the second half of the nineteenth century This volume reproduces literary examples which explore the many facets of women s entry into the medical profession and their experiences once qualified This volume broadens literary and cultural understanding of female doctors through the selection of sources which are less well known or more difficult to find as well as considering global examples or

contexts By including sources which reveal both supportive and derogatory assessments and by male and female authors a wide range of opinions regarding women s efficacy as medical practitioners are considered Accompanied by extensive editorial commentary this title will be of great interest to students of Women s History and the History of Medicine

Georgia O'Keeffe Janet Souter, 2011-07-01 In 1905 Georgia travelled to Chicago to study painting at the Art Institute of Chicago In 1907 she enrolled at the Art Students League in New York City where she studied with William Merritt Chase During her time in New York she became familiar with the 291 Gallery owned by her future husband photographer Alfred Stieglitz In 1912 she and her sisters studied at university with Alon Bement who employed a somewhat revolutionary method in art instruction originally conceived by Arthur Wesley Dow In Bement's class the students did not mechanically copy nature but instead were taught the principles of design using geometric shapes They worked at exercises that included dividing a square working within a circle and placing a rectangle around a drawing then organising the composition by rearranging adding or eliminating elements It sounded dull and to most students it was But Georgia found that these studies gave art its structure and helped her understand the basics of abstraction During the 1920s O Keeffe also produced a huge number of landscapes and botanical studies during annual trips to Lake George With Stieglitz's connections in the arts community of New York from 1923 he organised an O Keeffe exhibition annually O Keeffe s work received a great deal of attention and commanded high prices She however resented the sexual connotations people attached to her paintings especially during the 1920s when Freudian theories became a form of what today might be termed pop psychology The legacy she left behind is a unique vision that translates the complexity of nature into simple shapes for us to explore and make our own discoveries She taught us there is poetry in nature and beauty in geometry Georgia O Keeffe's long lifetime of work shows us new ways to see the world from her eyes to ours **The Argosy** Charles William Wood,1900
