

MODEL SPECIFIC INFORMATION

Stability

The RT800E is an aerial lift that should have a maximum radius of 10 feet with a load. Without a load, a radius of 10 feet is safe for 90 degree rotation. A radius of less than 10 feet must be avoided completely because of inherent stability considerations.

Access Platform Hand Rail

Ensure that the hoist access platform hand rail (1) (Figure 2-11) and step (2) (2) (hoist counterweight units only) are in the travel configuration. Remove pins from hand rail and rotate it down into the travel position, removed pins. Put the step locking pin out, slide the step in to the travel position and release the lock pin.

Use the hoist access platform (1) (Figure 2-11) when working in the hoist area (hoist counterweight units only).

OVERLOAD INSPECTION

This information supplements the Rated Capacity Label (RCL) manual supplied with each Crane crane.

When the RCL system has acknowledged an overload on your crane, you must carry out specified inspections on the crane.

These inspections apply only to overloads up to 50%. For overloads of 50% or higher, crane operation must be stopped immediately and Crane Care must be contacted for corrective action.

The following illustrations may not be an exact representation of your crane and are to be used for reference only.

To avoid an accident caused by overload damage to your crane:

- Perform the inspections outlined in this publication for overloads up to 50%.
- Stop operating the crane and contact Marmon/Crane Care immediately for overloads of 50% and higher.
