The cycle duration indicated on the display or instruction manual is an estimate based on standard conditions. The actual duration may vary in relation to several factors, such as the temperature and pressure of the incoming water, ambient temperature, amount of detergent, load quantity and type, load balancing and any additional options selected.

1) Test wash cycle in compliance with regulation 1061/2010:

This cycle is designed for normally soiled cotton loads and is the most efficient in terms of both electricity and water consumption; it should be used for garments washable at 60°C or at 40°C. The actual washing temperature may differ from the indicated value.
