Taylor, 2004 The goal of

this book is to assist families and caregivers in the early intervention care and development of the toddler and to be instrumental in reaching the child's potential. By drawing attention to the ways in which some children with disabilities have been excluded from public education, these families and caregivers become aware of the importance of understanding the law, its content, and its implications. It is also important to be aware of the laws that have been tested through litigation. The author provides a comprehensive yet easily understandable background on these laws and includes basic insight into various examples. Main topics include: 1. Federal legislation and state compliance, child find, and screening evaluation; determination of eligibility; the IFSP service delivery and reimbursement of the early intervention process; 2. co-treatment and assisted intervention; counseling; limiting services; the efficacy of early intervention; 3. professional responses; consumer satisfaction and knowledge of risk versus at-risk challenges; and 4. socioeconomic and cultural diversity and how professionals view each other as team members, including their comments. Personal experiences are provided which serve to make a point and/or bring levity to sometimes grave situations. These experiences contribute to the subjective opinions and research findings that promote the efficacy of early intervention. In addition, this book explores the benefits and success of animal-assisted intervention. The primary audience for the book includes parents, educators, social workers, and others who work with toddlers who have special needs and challenges.
