Cardiac Anesthesia: A Problem Based Learning Approach Mohammed Minhaj, 2019-04-19 Cardiac Anesthesia A Problem Based Learning Approach provides a comprehensive review of the dynamic and ever changing field of cardiac anesthesia Its problem based format incorporates a pool of multiple choice questions for self assessment Each of its 36 case based chapters is accompanied by questions and answers accessible online in a full practice exam The cases presented are also unique as each chapter starts with a case description usually a compilation of several actual cases it then branches out through case based questions to increasingly complex situations This structure is designed to create an authentic experience that mirrors that of an oral board examination The discussion sections that follow offer a comprehensive approach to the chapter s subject matter thus creating a modern complete and up to date medical review of that topic Henke's Med-Math Susan Buchholz, Grace Henke, 2008-09-01 Now in its Sixth Edition this best selling text features a highly visual hands on approach to learning dosage calculations and principles of drug administration It presents step by step approaches to solving problems and includes dosage problems that simulate actual clinical experience Each chapter includes numerous examples self tests and proficiency tests This edition presents all four methods of calculation side by side ratio proportion formula and dimensional analysis New material on enteral feedings heparin infusions and insulin infusions is included Drug labels are current and problems use JCAHO approved abbreviations A handy quick reference plastic pull out card shows conversions and formulas

Common Perioperative Problems and the Anaesthetist G.M. Woerlee, 2012-12-06 Dr G M Woerlee is well known in my department both as a clinician and teacher Years of experience have taught him that the problems discussed here have as yet not been treated in this way in any single work In my opinion there is a real need for such a book not only for resident and specialist anaesthetists but also among surgeons and internists specialist and trainee Management of a patient in the operating room is a matter of teamwork and knowledge of the problems encountered is the basis of any mutual understanding The information which has been assembled and clearly presented in this book should prove to be of great assistance in guiding our patients through an important phase of their lives Professor Dr Joh Spierdijk Department of Anaesthesia University Hospital of Leyden The Netherlands vii PREFACE Much of the literature being published in the field of anesthesiology today concerns a narrow in depth scrutiny of a specific area or anesthetic technique that does not provide the novice with an overview of the perioperative period and the common everyday problems faced by the anesthetist Dr G M Woerlee of the University of Leiden with his book Common Perioperative Problems and the Anaesthetist has filled a void in the current anesthetic literature Dr Woerlee reviews in a straightforward no frills manner problems routinely encountered during the perioperative period Other anesthesia textbooks do not cover the material in quite the same logical step by step fashion
