GCE Advanced Subsidiary Level and GCE Advanced Level

**MARK SCHEME for the May/June 2013 series**

**9708/21**

**9708 ECONOMICS**

Paper 2 (Data Response and Essay – Core).  
maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

## **June 2013 Economics Transport Mark Scheme:**

**REWAS 2013** Anne Kvithyld, Christina Meskers, Randolph Kirchain, Greg Krumdick, Brajendra Mishra, Markus Reuter, Cong Wang, Mark Schlesinger, Gabrielle Gaustad, Diana Lados, Jeffrey Spangenberg, 2016-12-05 This volume compiles topics from the REWAS 2013 symposium at the TMS Annual Meeting focusing on different aspects of sustainability. It discusses how to realize sustainability in such areas as transportation, the built environment, electrical and electronic equipment, and infrastructure, energy production, and water systems. Enabling sustainability topics include the use of metals and materials, processing, recycling, and recovery, as well as process design and modeling. The book focuses on understanding sustainability through life cycle management and analysis, systems modeling and design, and education and consumer awareness.

The Routledge Handbook of Transport Economics Jonathan Cowie, Stephen Ison, 2017-08-07 The Routledge Handbook of Transport Economics offers the first state-of-the-art overview of the discipline of transport economics as it stands today, reflective of key research and policy. Transport is an important area of study and one which is problem-rich, stimulating a great deal of debate in areas which impact on everyday lives. Much of this focuses on the practicalities of the modern-day phenomenon of mass movement and all of the issues which surround it. The discipline of economics is central to this debate, and consequently the study and application of transport economics has a chief role to play in seeking to address subjects relating to major transport issues. It can be argued that at the very heart of any transport issue or problem lies the underlying economics of the situation. Understand that and you alleviate the problem. Featuring contributions from world-leading scholars and practitioners from across the globe, all of the chapters within this book are written from a practical perspective; theory is applied and developed using real-world examples. The book examines concepts, issues, ideas, and practicalities of transport provision in five key topic areas: public transport, public transport reform, economic development, and transport modelling, transport and the environment, freight transport. A real strength of the book is in linking theory to practice, and hence the economics that are examined in this text are not the economics of the abstract but rather the economics of everyday living. Practical and insightful, this volume is an essential reference for any student or researcher working in all areas of transport provision, ranging from planning, appraisal, regulation, and freight, and for all practitioners looking to develop their professional knowledge and who are seeking professional accreditation.

Potential Exports and Nontariff Barriers to Trade Asian Development Bank, 2020-01-01 This publication explores how India could boost its exports by addressing nontariff trade barriers. It focuses on sanitary and phytosanitary measures and technical barriers to trade and on export products that have the potential to increase their market share in Bangladesh, Bhutan, Maldives, Nepal, and Sri Lanka. It considers options including legal reforms, the upgrade of quality standards, and laboratory equipment and institution building of accrediting bodies and conformity assessment bodies. Practical recommendations suggest ways forward for both the public and private sectors.

*On Unemployment* Mark R. Reiff, 2015-10-07 With unemployment at historically high rates that show signs of becoming structural there is a pressing need for an in depth exploration of this economic injustice Unemployment is one of the problems most likely to put critical pressure on our political institutions disrupt the social fabric of our way of life and even threaten the continuation of liberalism itself Despite the obvious importance of the problem of unemployment however there has been a curious lack of attention paid to this issue by contemporary non Marxist political philosophers *On Unemployment* explores the moral implications of the problem of unemployment despite the continuing uncertainty involving both its causes and its cures Reiff takes up a series of questions about the nature of unemployment and what justice has to tell us about what we should do if anything to alleviate it The book comprehensively discusses the related theory and suggests how we might implement these more general observations in the real world It addresses the politics of unemployment and the extent to which opposition to some or all of the book's various proposals stem not from empirical disagreements about the best solutions but from more basic moral disagreements about whether the reduction of unemployment is indeed an appropriate moral goal This exciting new text will be essential for scholars and readers across business economics and finance as well as politics philosophy and sociology
